PARIS, FRIDAY, AUGUST 21, 1981

Arab States Denounce U.S. For Downing Libyan Jets Syria Promises Support; Clash Illustrates Resolve

U.S. Navy Exercises End

From Agency Dispatch

BEIRUT — Arab countries condemned the United States on Thursday for shooting down two Libyan planes over the Mediterranean Sea, and Syria pledged full support for Libya.

pledged full support for Libya. In Washington, the State Department renewed its request for U.S. firms in Libya to leave their opera-tions because of "deteriorating relations" with the government of Col. Moamer Qadhafi. The U.S. Navy's 6th Fleet concluded on Thursday the two-day. maneuvers during which the air clash took place. Libya, which denounced the shooting down of the two Soviet-made Libyan int Scherer as correspondent

two Soviet-made Libyan jet fighters as aggression "planned by the Pentagon," said Thursday that there would be no reprisals against U.S. oil workers in Li-

bya. Tass termed the clash an act of banditry and "an intentional if not premediated action" reminiscent of the Gulf of Tonkin incident that led to deeper U.S. involvement in Vietnam. Both the Tass dispatch and a report on a nationwide Soviet evening news pro-gram quoted heavily from unfavorable international reaction.

reaction. Newspapers in Kuwait, Bahrain and the United Arab Emirates, all of which generally reflect their government'a opinions, charged that Washington was "perpetrating aggression itself, rather than instigat-ing Israel to do so." They urged the Arabs to patch up their differences and face the "American enemy" as one bloc.

Lebanese newspapers expressed concern that the incident could unleash further violence in the Middle East

· U.S. Account

According to the U.S. account the Libyan jets were downed about 60 miles (96 kilometers) off the Libyan coast during 6th Fleet mancavers Wednesday after one of the Libyan planes opened fire on two Navy jets.

Libya said that the planes from the U.S. carrier Nimitz fired first, that one U.S. F-14 fighter jet was shot down in a dogfight over the Gulf of Sidra and that U.S. helicopters were seen picking up the downed U.S. pilot. The Libyan Navy found the wreckage of the U.S. plane, Libya said. The Pentagon

denied the report. Libya claims the gulf and the area 12 miles beyond the line from Benghazi to Misrata on either side of the gulf, a Libyan official said. The United States recognizes a three-mile limit.

In an effort to back up its claim that it downed one of the U.S. planes, the official Libyan news agency JANA transmitted what it said was an interview with the pilots of the two Libyan SU-22 jets shot down

over the gulf. "We were carrying out a contine recommission mission inside Libyan teoritorial airspace at 7 a.m. yesterday and we were attacked by eight U.S. F-14 jets which opened fire on us," JANA quoted the pilots as saying. "We responded and hit one of them and saw it burn and crash into the sea." Pentagon officials said the two Libyan pilots were

apparently acting on their own and were not under orders from superiors when they engaged the U.S. planes.

By Joseph Fitchett International Herald Tribune

Of Reagan to Use Force

**R

PARIS - The U.S.-Libyan air battle - the first acknowledged combat for U.S. forces since the res-cue of the Mayagnez from Cambodian captors in 1975 — demonstrated the Reagan administration's proclaimed readiness to use force on behalf of U.S. rights.

Despite the low-key handling of the episode in Washington, the Reagan administration — on condi-tion that its version of events holds up — can expect a diplomatic success out of its military action. Both the target and the timing will help ensure that result. The administration, with its confrontation position

NEWS ANALYSIS

toward anti-American governments, put at the top of its enemies' list the Libyan leader, Col. Moamer Qadhafi, whom it sees as a Soviet surrogate.

Col. Qadhafi until recently enjoyed an ambiguous image in the West as a radical Arab who nonetheless practiced staunch anti-Communism and offered attractive business deals. In recent conversations, however, strategists in the State Department, Pentagon and National Security Council stressed the U.S. view that Col. Qadhafi had become a dangerous figure, whose personal ambitions also served Soviet aims —

and harmed Western interests. A humiliation for Col. Qadhafi by the United States will be widely rated as a blow by proxy at the Soviet Union. It will also be seen as a sign of U.S. determination to reassure nearby Arab and African leaders by opposing any future assertiveness by Col. Qadhafi beyond Libya's borders. Col. Qadhafi's support for terrorism and his hatred

of Israel outraged some Reagan administration offi-cials. It made him a supporter of radical Arabs and foe of pro-U.S. Arabs.

Strategically, his growing arsenal has made him a significant source of instability in North Africa, which appears even more dangerous to the United States.

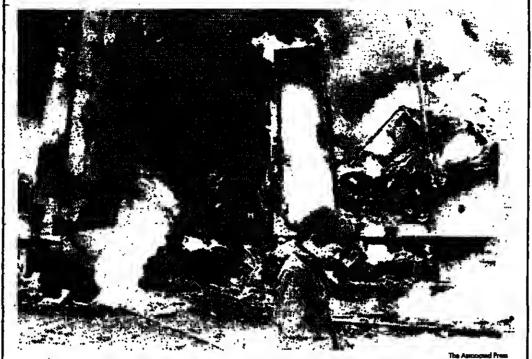

Libya is a growing local military power capable of intimidating black African governments. Libyan troops intervention in Chad crystalized this concern both in Washington and in Paris.

North Atlantic Treaty Organization planners worry that his \$12-billion stockpile of Soviet-made weapons has made Libya a military facility that, in a crisis, could directly threaten Western operations in the Mediterranean.

Invasion Expected

Against a background of rumors that the Reagan Against a background of rumors that the Reagan administration is plotting to eliminate Cot Qadhafi, the Libyan leadership, according to reports, has been expecting a U.S.-backed Egyptian invasion to over-throw the regime. When the current U.S. Sixth Fleet maneuvers were announced, Col. Qadhafi, whose tight personal security reportedly is supervised by East Germans, left Libya early for a meeting in Administration of the content of the c

A desire to improve relations and a growing Angolan concern over the escalation of South African military attacks on its territory were the main impressions gained by a U.S. congressional delegation by a U.S. congressional delegation that ended a 31-hour visit here Tuesday night, according to Rep. Howard Wolpe, the Michigan Democrat who led the group.

The United States, however, thursday reaffirmed its position that there can be no normalization of relations with Angola as long as substantial numbers of Cuban troops remain there, the Associated Press reported.

["Cuban troops, in our view, jeopardize the achievement of last-ing peace in the region," State De-partment deputy spokesman Alan Romberg was quoted as saying in Washington 1 Washington.]

Tour of War Zone

The five members of the House of Representatives, all Democrats, were given a top-level reception and the most extensive tour of Angola, a Soviet ally, that has been accorded to any of the few official U.S. delegations that have visited the country.

The delegation met for an hour with President José Eduardo dos Santos. It was believed to he the first time that the Angolan leader has met with U.S. officials since he look office two years ago.

The delegation also was taken to relations, the level of reception and the edge of the war zone, 250 miles the rare access of the congressmen (400 kilometers) north of the bor-der of Namibia (South-West Afrito the Angolan countryside was significanı. TOMORROW

Tale of Two Cities

Paris' rue Mouffetard, in one of the oldest sections of the city, is changing from a place where people live to a place where people go at night, from an old neighbrhood of street markets and bistros to a fixedup ghetto of the rich and their night spots. The tale of two "cities" fighting for the same space, Saturday in the Trib.

١,

idarity representatives claimed that 40,000 of 60,000 printers had supported the strike - the first of its kind in the last year here or in the Socialist states of Eastern Europe. Janusz Onyszkiewicz, the union's main spokesman, jokingly suggested that the government's figure of 2 million "had a few extra zeros.

"If we bave no results," said Mr. Onyszkiewicz, referring to Solidarity's demand for regular television and radio time. "we may have to strengthen this action. Maybe the next time it will be three or more days, ann maybe we will have to include radio and television."

rie said that talks were scheduled to start with the government on the contentious issue next week, although the state's representative had not yet been designated.

Jerzy Halas, a national coordinator of the strike, said that early Wednesday morning the manager of an emergency printing plant in Warsaw had ordered Solidarity militants to "abandon the area in t5 minutes or the security forces would intervene." The group of workers had physically prevented 5,000 copies of Życie Warszawy, a daily, from being distributed.

On the economic front, the gov-ernment Thursday announced details in Trybuna Ludu of proposed increases in the cost of bread. A loaf of bread would go up from 6 to 16 zloty t17 U.S. cents to 46 cents) in the first major increase in more than a decade.

The newspaper also said that prospects for meat supplies in the last quarter were bad and that there was a danger that meat rations, already reduced, would bave to be cut further. The news agency PAP reported that the government had decided to extend butter rationing until at least the end of the year and also reported that deter-gent rationing would begin on Sept. 1.

Poland Accepts Banks' Terms

FRANKFURT (Reuters) - Poland has broadly accepted proposals by Western banks allowing it to defer repayment of some \$2.8 bil-lion of debt falling due this year. Western bankers said.

The proposals were presented to Poland at a special meeting with its creditor banks in Zurich on July 22. Bankers said the initial reaction to the Polish response was one of relief and general satisfaction.

Poland, which owes at least \$27 billion to the West, is believed to have expressed some reservations about details of the rescheduling plan, which would relieve Poland of making capital repayments on ⁰⁵ percent of its debt falling due in the last three quarters of this year. although interest navments would continue.

Unusually Warm Welcome Rep. Wolpe said the welcome accorded to the congressmen was one of the warmest in their African tour, which has included Zimbabwe, South Africa, Kenya and Somalia. The team then left for Nigeria, the last stop of the trip. Considering that Angola and the United States have no diplomatic

not raised it. "There has been a change in our policy whereby we put China on the same level as most other countries. The kinds of weapons that we would supply are defensive weapons ... certain kinds of vehicles, for instance, certain kinds of aircraft, and radio equipment," he said.

40,000 Trapped by Floodwaters in China United Press International

PEKING --- Fresh downpours hit two provinces in central China and flood waters trapped 40,000 persons, killing at least 38 and making tens of thousands bomeless, officials said Thursday.

In addition to the devastated province of Sichuan, which was inundated for the second time this summer, severe flooding also occurred in neighboring Shaanxi province, government broadcasts said.

Bonn Cool to Repositioning of U.S. Troops The Associated Press

BONN - Responding to questions from the political opposition, the West German government said Thursday it has no current plans to garrison U.S. troops closer to the East-West border.

The United States has proposed moving the bases for some of the 206,000 American troops in West Germany closer to the East German 200,000 American troops in west Germany closer to the cast German and Czech borders for a variety of reasons, including better tactical positioning, improvement of outmoded facilities and improvement of living conditions for troops and their dependents. "This redeployment is seen not as an immediate measure, but as some-thing to be considered over the next 30 years," the West German govern-ment coid.

Pinto Balsemão to Form Lisbon Government Read

LISBON - The Social Democratic Party leader, Francisco Pinto Balsemão, Thursday agreed to form a new government of the ruling Democratic Alliance coalition, a party spokesman said.

Mr. Pinto Balsemão, who resigned as premier Aug. 10, had also invit-ed Diogo Freitas do Amaral, leader of his Christian Democratic coalition partners, to become deputy premier in the new administration, he added

The announcement was made after a meeting between Mr. Finto Balsemão and representatives of the party's national council. President Antonio Ramalho Eanes must formally appoint the new preuner and a party delegation is to call on him Friday.

Afghan Rebels Reported Falling Back in West

MOSCOW --- Insurgents still control parts of Afghanistan's western Herat province but have lost ground over the past six months, the Soviet government newspaper Izvestia said Thursday in the latest of a series of admissions about gnerrilla activity that Western diplomats say may be aimed at persuading Soviet citizens of the need for troops in Afghanistan.

In a report from the area, which borders Iran, the daily said that vehicles bringing supplies from the city of Herat to army units were able to travel only under armed escort. But the guerrillas had been beause back in most areas and only one of the province's 12 districts was fully in their hands now, Izvestia said.

The newspaper said the insurgents had almost been to control of Herat city six months ago. It said that conditions in most of the province had returned to normal in the meantime but that the guerrillas were still offering strong resistance in places.

Costa Rica Denies It Faces a Leftist Threat

New York Tames Service

SAN JOSE, Costa Rica --- Government and opposition leaders here have angrily disputed a charge hy Jeane J. Kirkpatrick, the U.S. dele-gate to the United Nations, that Costa Rican democracy is being undermined by Communist subversion.

During a six-nation swing through South America this month, Mrs. Kirkpatrick also noted that Costa Rica, which dismantled its army in 1948, was ill-equipped to deal with political terrorism. "Their economy is weak," she told reporters, "and we can help them with some training for their police."

But while three leftist terrorist incidents this year awakened fears that Central America's political troubles might prove contagions here, the consensus among both officials and their critics is that the main threat to Costa Rica's stability comes from the country's severe economie crisis and not from Communist agitahon_

Costa Rica's president, Rodrigo Carazo Odio, complained in two letters in the U.S. ambassador bere, Francis J. McNeil, about the "exaggeration and falsehood" of Mrs. Kirkpatrick's remarks and he stated, categorically, "Costa Rica does not want military aid."

Elections in February

Luis Alberto Monge, a Social Democratic politician who is favored to win the presiden-tial elections scheduled for February, said, "We can deal with Communism without weap-ons or military training from the U.S., but we pre favore science science president are facing serious socio-economic problems and we do need U.S. help and understanding to fight inflation, unemployment and bunger."

"A small democracy has been fighting a lonely battle so far." Mr. Monge said in an interview. "Costa Rica offers a great opportu-nity for the United States to show that the problems of an economic crisis and underdevelopment can be dealt with democratically. I can't tell people not to take the Marxist-Lenin-ist road if we can't show them an alternative."

Until Mrs. Kirkpatrick's remarks this month, the Reagn administration had shown little sign of having recognized Costa Rica's severe economic troubles. "Now that someone bas noticed us, we're being given the scratched record of anti-Communism," an opposition oolitician said, referring to Mrs. Kirkpatrick's effort to link economic disruption with Com-

munist interference. "We appreciate the generous offer of police training," said an editorial in the local English-language newspaper, The Tico Times, "but a little cold cash to help bail Costa Rica out of lits economic crisis would no a lot for the its economic crisis would go a lot further toward preserving local stability than would pseudomilitary assistance in a country that is proud of its pacifist tradition."

Drop in Coffee Prices

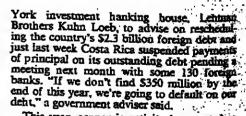

Although Costa Ricans have long consumed more than they produce and imported more than they exported, the present crisis was brought on hy the sharp rise in world oil prices last year and the drop in the price paid for this country's coffee exports. And, with foreign banks no longer willing to finance the resulting trade and hudget deficits, the country's curren-cy was sharply devalued and the economy went into a slump.

went into a slump. Adding to the uncertainty, the popularity of the Carazo administration has collapsed, with even former supporters of the president charg-ing him with mismanagement of the economy, centralizing power and covering up a scandal involving arms trafficking to other Central American countries by senior officials. This month, the government hired the New

This month, the government hired the New

duy.

This year, economic activity is expected in shrink by l or 2 percent, while an inflation rate of 40 percent is forecast. Unemployment, which has traditionally hovered around 5 per-cent, has more than doubled in the last eight months while more than doubled in the last eight months, while many small businesses have gone bankrupt.

Bishops' Letter

"The economic collapse inevitably affects our social situation," the country's bishops said in a pastoral letter this month. "Broad sectors of the population are suffering from progressive impoverishment, the quality of life is deteriorating, the confusion of the labor soc. tor is growing and the gap between rich and poor is widening."

So far, however, despite the impact of the crisis on the purchasing power of ordinary Costa Ricans, there have been no signs of 30cial untest, with even Communist-run unions

ally quiet. "It's a remarkable place," a foreign diplo-mat remarked. "There haven't even been pro-test marches about the cost of living. Everyone test marches about the cost of living. Everyone is just waiting for the next government to solve the crisis."

Mr. Monge in fact believes he is so far ahead of his main challengers for the presidency, Rafael Angel Calderon Fournier of the Unity Party and Mario Echandi of the Nationalist. Movement, that he is barely campaigning and is concentrating on preparing his team and programs to confront the problems he expects to inherit.

"Carazo's management of the economy and his relations with financial institutions have been catastrophic, quite apart from his admin-istration's widespread reputation for dishoner, y," Mr. Monge said. "But I have been sayner in my trips abroad, you can't punish the sev-ernment without punishing the people. Abroad-they say, we'll wait until after the elections if help you, but I say we can't wait."...

Wattington Per Service WASHINGTON — Congres-sional hearings will be held next month on a published allegation that U.S. government scientists kept giving leukemia patients ex-perimental high-dose radiation therapy between 1964 and 1974 in a "substandard" project at Oak Ridge, Tenn., so that the U.S. space program could learn how much radiation a person could ab-

sorb without becoming ill. According to an article by How-ard L. Rosenberg in Mother Jones, a leftist consumer-oriented monthly noted for its muckraking, the patients were not told of the National Aeronautics and Space Ad-ministration's interest, which concerned protecting astronauts so that they would not become nauseated from radiation in space while wearing oxygen masks. For many of the 194 patients, some treatment other than radiation would have been advisable, Mr.

Rosenberg alleged. The project, administered by the Institute of Nuclear Studies, was closed in 1974 by the old Atomic Energy Commission after an in-spector determined that it was "substandard" and had produced "dismal" results. On Wednesday the Investigations and Oversights Sabcommittee of the House Committee on Science and Technology announced that it would hold hearings on Mr. Rosenberg's allegation

Dr. Clarence Lushbaugh, who monitored the radiation patients for NASA, responded in an interview that the decade of experiments was conducted only for therapeutic purposes and only when medically appropriate, and that NASA funding was not essential to the program.

The article said that all of the cancer patients who passed through the laboratory between 1964 and 1974 were referred by outside doctors and were considered terminal cases. Some of the patients received up to 500 rads of radiation over varying periods of time. (A sudden dose of 450 rads causes quick death in half the people exposed.)

U.S. Charges 4 With Sales Of Equipment to Russians

Recruiting Experiment Puts CIA 'On the Air'

The Associated Press

WASHINGTON --- The CIA is broadcasting advertisements designed to recruit agents for overseas duty and to dispel the notion that it draws exclusively from the "old boy network" at Eastern universities

The radio spots are part of an experimental program that began in Salt Lake City in May and which continued Wednesday in Atlanta with this spiel: "We are the Central Intelligence Agency,

We're looking for very special people. You may be one of them." An announcer tells listeners that if they are college graduates, interested in foreign affairs, know a foreign language or can learn one, are willing to live abroad and "can make on-the-spot decisions." they may be able to become a member of an "elite group." The starting salary for trainees is \$22,000. At CIA headquarters in Langley, Va., Charles Jackson, a re-

cruiting officer, said that the agency needed people to serve as "overseas case officers, running networks, that kind of thing," as well as intelligence analysts, scientists and computer specialists. The latter two groups are the most difficult to recruit, he said, because of competition from private industry.

Mr. Jackson said that the agency wanted to do away with the notion that it relied mainly on Eastern universities for personnel. "We have a broad cross-section of people here," he said.

In the past, CIA recruiting has been low-key, with an occasional newspaper advertisement supplemented by notices in academic iournals.

Mr. Jackson declined to say how many vacancies the agency has. Its budget and staff figures are classified.

Relaxed Rules on Spying by FBI Urged to Help Guard President

that day but canceled his trip.

The arrest record was not passed

ville, Tenn., as he attempted to board a plane with three pistols. WASHINGTON - The United States should case restrictions on The arrest came the day that thendomestic spying by the FBI in or-der to meet the threat of assassina-President Jimmy Carter was making a campaign appearance in Nashville. Mr. Reagan had planned to be in nearby Memphis tion attempts on the president, a government report has suggested.

The Treasury Department re-port on the March 30 shooting of President Reagan also suggested easing other legal and technological harriers that hamper the Secret Service's information gathering on potential assailants.

The 101-page document released Wednesday said that Secret Ser-vice and White House advance teams need to improve security planning, and more special agents should be assigned to the presi-dent dent.

Praise for Agencies

The report, however, concluded that the Secret Service, the Bureau of Alcohol, Tobacco and Firearms - which traced the gan used in the attack — and other Treasury agen-cies performed well.

Domestic intelligence gathering by the FBI should be expanded. the report suggested, and the pri-vacy and Freedom of Information acts should be narrowed to make it easier.

The report contended that 1976 restrictions on FB1 activities have caused a decline in useful information. The guidelines were in response to disclosures of FB1 abuses in the 1970s, when the agency was in confrontation with

civil rights and anti-war groups. "As the March 30 incident reveals, physically surrounding the president is not sufficient protec-tion," the report stated. "The president's ultimate shield must be the ability of the Secret Service to keep him out of dangerous environments. This the service cannot do without ... information about the intentions and plans of potentially dangerous people."

The question was raised because John W. Hinckley Jr., the accused assailant, was arrested during the presidential campaign in Nash-

Birth Control Pill's Risks Linger, U.S. Survey Says

By Victor Cohn Washington Post Service

WASHINGTON --- Women who use birth control pills for several years not only increase their risk of suffering a heart attack while on the pill but are up to three times as likely to have one years after they stop using the oral contraceptive, according to a new study hy American universities.

The longer a woman uses the pill, the greater her chance of a heart attack, the study also indicat-

Medical epidemiologists --- scientists who study disease patterns - have long known that users of orai contraceptives have from three to four times the normal incidence of heart attack. They have been less sure, however, whether pill's chemical effects linger and affect the heart later on.

Ouestion Tackled

The question was tackled by doctors at Boston University's Drug Epidemiology Unit five years ago. With scientists from Harvard University and the University of Pennsylvania, doctors studied the records of 556 women aged 25 to 49 who had a myocardi-al infarction — or heart attack — and had entered 155 hospitals in Massachusetts, New York, Connecticut, Pennsylvania and New Jersey between 1976 and 1979.

in The New England Journal of Medicine, should "be interpreted with caution" until repeated in other studies, the authors said.

assailant

Among all past users of the pill, including those who have used the pill only a short while, there were just 20 percent more heart attacks than expected. But women aged 40 to 49 who had used the pill for more than five years had 60 percent more attacks than other women the same age. And women aged 40 to 49 who had used it for 10 years or longer had 21/2 times as many attacks.

concluded. Even if the Secret Ser

vice had been told, it prohably

would not have spotted a threat,

The report limited its review to

agency procedures and did not deal with individual errors, such as

the failure of Secret Service agents

to notify doctors that exploding

hullets may have been used by the

the report said.

In short, the researchers say, the heart attack rate was apparently increased "approximately twofold to threefold" in women who used the pill for more than 10 years be-

fore quitting. Between 5 million and 8 million American women, and an estimat-ed 25 million to 50 million worldwide, now use the pill. Of the women the Boston epidemiologists surveyed, nearly one in 10 had relied on it for five years or longer.

However greatly a woman may increase her chance of a heart at-tack, that chance may still be small, depending on age. So far the Boston University researchers can only comment on the effect on past users up to age 49, and on women who stopped using the pill for up to nine years. It will take further study to measure the effect

The U.S.-Libya Collision More Than Meets the Eye?

If the Pentagon's account of how and why two U.S Navy F-14s shot down two Libyan Sukhoi 22s is correct, there is little doubt that the action was justified. Libya, unilaterally claims territorial waters that conflict directly with the international consensus on what constitutes the high seas. The dogfight took place over those waters. The Sixth Fleet was within its rights to test them, as it did in 1979, without being attacked. An inquiry should determine whether the U.S version is accurate, but for the moment there seems tobe no evidence to the contrary.

A question more interesting than whether the fleet had a right to be where it was, or whether the U.S. pilots were right to return Libvan fire, is whether the Mediterranean maneuvers fit into a broader framework of U.S. efforts to rid the world of Libyan ruler Col. Moamer Qadhafi. There is no hard evidence available, but there is an interesting pattern of U.S behavior that is illuminating. if inconclusive.

It was an open secret in Washington, for example, that the Reagan administration was looking for ways to get Col. Qadhafi, wbo was being widely referred to by officials as "the most dangerous man in the world." The first big inter-departmental foreign policy study ordered was on how to neutralize Libya and its "lunatic" leader. Several reporters were told on background by responsible high-level officials that various approaches were being explored, including a joint effort with Egypt or Israel, and that assassination could not be ruled out.

In public, high-ranking U.S. officials in-

cluding Secretary of State Alexander M. Haig Jr. spoke out frequently about the need to contain Libya's aid to terrorists, its aggression against African neighbors and its enor-mous military buildup. The United States asked other countries to condemn and isolate the Qadhafi regime. It offered special aid to countries such as Tunisia and the Sudan that were being threatened by Libya. And finally, following a murder apparently ordered by Tripoli, it expelled Libva's diplomats from the United States. Oil companies were advised to evacuate their U.S. employees from Libya. "The companies won't get another warning," an unnamed official told The Wall Street Journal. "We're playing confrontation politics and we want them out, whether there is a coup in the works or not."

None of that proves that the fleet maneuvers were part of a concerted effort against Libya or that the U.S. aircraft purposely provoked the Libyan pilots into firing at them. But it can't belp make an observer curious about whether there wasn't more to the incident than is apparent. Adding to the mystery was the question as to whether the relaxed attitude of the White House staff, which let the president get an extra six hours sleep before telling him what had happened, suggests possible foreknowledge that an incident might occur. The evidence might be thin, or even nonexistent, but there is a hint of something other than the purely spontaneous about the affair. And one can't help but wonder whether it will be the last clash between Libya and the United States while Ronald Reagan is president.

INTERNATIONAL HERALD TRIBUNE.

Over the Gulf of Sidra

That was no idle decision to order the U.S. Sixth Fleet to conduct maneuvers in the Gulf of Sidra, some 60 miles from the shores of Tripoli. The aim. clearly deliberate, was to test Col. Moamer Qadhafi, whose radical Libyan regime lays sovereign claim to those waters. And two Libyan jets were downed by U.S. fighters, but only after those Sovietbuilt planes fired first. So runs the Reagan administration version of the episode, and what is wrong with that?

On the face of it, absolutely nothing. There is nothing new about disputes over territorial waters, here or elsewhere. Other maritime nations have shown the flag just as forcibly. The United States has had similar problems, and in these waters, since the confrontations with the Barbary pirates of our early history.

For that matter, the same Sixth Fleet held maneuvers in the same gulf only two years ago. That provoked Libyan protests - but

If the legal argument is cloudy, the administration's disgust is not. From the outset, President Reagan has put Col. Qadhafi high on his enemies' list, and with reason. Libya's apparent involvement in plotting assassina-tions in the United States has led to a full break in diplomatic relations.

But no matter how widespread the U.S. revulsion at Col. Qadhafi, it does not follow that the Reagan administration automatically wins full benefit of any doubt - not from a generation that remembers maritime milestones called the Bay of Pigs and the Gulf of Tonkin.

The original Credibility Gap opened up, it will be recalled, when an U.S. president told less than the truth about a patrol boat attack. in the latter, and used that murky incident to justify the massive buildup in Vietnam. There may be no more to Wednesday's episode in the Gulf of Sidra than meets the eye,

'Remember — Any Time You Need a Little Nuclear War —'

Dangers of a Summer Listing

By Joseph Kraft

WAINSCOTT, LI. - I called ice and said he was calling at the suggestion of Mrs. Sundae, the snto find the telephone number of Vic Caputo, a friend with whom I occasionally play tennis on sum-mer weekends here in Long Island. Information gave me the number 537-0585. f dialed it. Instead of Caputo, I reached another friend, Elizabeth Barlow. Mrs. Barlow told me there had

been a mixup. The Caputos had rented ber house last summer. This summer they had rented another house, and been given another telephone number. But the change dae. Then the voice asked what she could do. was not yet in the records. What I had to do was call information again, and ask for the summer list-

I did that. Information did in-

deed give me another number. The

operator then volunteered that I

was entitled to a refund of the fee

charged for calling information the first time. He said I should call an-

other number for a credit. Having

called that number in the past, and

waited and waited and waited without receiving an answer, I

knew I was going to forgo the credit. But since the telephone

company was being so helpful. I thought I'd be helpful back. I told

the operator about the mixup be-

tween the Caputos and Mrs. Bar-

that about the only place they could be used is Europe. So the de-cision is bound to result in pre-sure on the allies to deploy them in European the allies to deploy them in

Western Europe. especially

Western Europe, expensive it. West Germany. Formally, the alloss cannot claim a veto right over Mr. Rengany de-cision, yet they feel entitled to the kind of consultation that Sectorary of Defense Caspar W. Weithende promised when he first rand-the neutron bomb issue last February as the time. Secretary of State All

nentron homb issue last February At the time. Secretary of State Al-exander M. Haig Jr. advised the NATO partners of the United States to discount Mr. Wein-berger's comment. When Way German Chancellor Heimet Schmidt visited Washington in May, he was clearly told that the issue was not topical. The whole affair faises dinom-ing questions about the way the Rengan administration intends to lead the Western alliance. Does it

Reagan administration manages to lead the Western alliance. Does it want to lead by diktat, imposing a defense strategy, dowing and a nonscittation to exposit factor an-nouncement? Will it take Europe

an nuclear donhis into coordora

tion, as it does the opposition in Utah and Nevada to the granding

MX, or will it try to lay down the

line by public strictures, with the secretary of defense saying in an many words that the neutron des-

sion was meant to punish the West

sion was meant to pumile the weat Germans — an ally that lattering met its defense obligations through the 1970s, when the United States dragged its feet, and which even now, when it must limit its growth of security outlays, takes one not to impair the fighting capabilities of the Bundesweit?

Hard to Escape

The allies have watched with

fascination the seven-month mg-of-war between Mr. Reagan's con-

servative ideologues ("the Wein-

bergers") and the conservative

pragmatists ("the Haigs"). They now fear the Weinbergers have won the day. They note that all the administration has come up with

so far is the simplistic notion to arm, arm, arm. An elusive super-

ority seems to be the goal. There is

no concept for arms control er.

Nor do "the Weinbergers" have any sense of priorities. The East-pean anti-nuclear lobby is already

emapaigning against NATO's deci-sion to modernize theater appear

forces. The revival of the neutron

debate can only make life more

difficult for the five embattled governments that are prepared as station 572 Pershing-2 and Cruise

missiles in their countries. It over-

loads the alliance system. It creates

unnecessary strains in the precen-ous relationship between East and

It is hard to escape the course

sion that the Atlantic affect are about to enter a zone of repri-lence. The danger is that Ma

HAMBURG — There is no de-nying that much of the Euro-pean agilation over Presideat Reagan's decision to build the neutron bomb springs from emotional insecurity rather than cool analysis. For, of course, the new neutron weapons are more "humane" than the 6,000 nuclear warheads that the 0.000 nuclear warneads that have been deployed in Europe for the past two decades. They would kill fewer people, if used. They are no more monstrous than the Soviet no more monstrous than the Soviet chemical weapons that also have the property of annihilating humans but sparing structures. They will not lower the nuclear threshold, will not hreak down the categorical distinction between conventional and nuclear arms, will not — given the ever-present risk of escalation to the present level — make nuclear war "fight-able," let alone "winnahie." They may strengthen deterrence simply because no one could possi-hly know for sure that they would

hly know for sure that they would not be used. The Russians would have to take into account that weapons that primarily eliminate Soviet tanks might be more readily employed than weapons that main-ly devastate the country meant to be defended.

Deadly Punch

The neopacifist arguments aren't very convincing, then. But neither are the timing, the style and the motives of the Reagan administration. Its decision, 100, betrays more emotional insecurity than clear-beaded thinking. It ig-nores fundamental issues of NATO's strategic doctrine, and it reveals a lack of diplomatic, political and psychological finesse rem-iniscent of the worst moments of

the Carter years. On the strategie plane, there are two troublesome problems. Are nentron weapons really "elassical weapons for defense"? Wouldn't they lend a deadly punch to an aggressor using them against the de-fender's strong points? The Russians are known to be working on neutron weapons. The West's tem-porary advantage could turn into a drawback.

Then, do nuclear battlefield weapons still make any political or military sense? Is a U.S. president ever going to command their use to stop Soviet armored columns tearing into West Germany if that carries the risk of destruction for large parts of the American home-

West German generals shudder at the thought that neutron weapons might be used indiscriminately "like DDT against flies." This would make nonsense of both the strategy of "flexible response" and the principle of selective, sparing, first use of nuclear wepaons in the event of war, Many European experts feel that anti-tank weapons, which NATO members are procur-ing by the hundreds of thousands, can do the job equally well — wothout risking the escalation of any horder skirmish to an atomic Armaggedon.

are political Since the days of hap-less Jimmy Carter, the "nentron homb" - has symbolized U.S. mismanagement of alliance affairs. While it is technically true that Mr. Reagan has only decided to pro-duce and stockpile the new weapons on U.S. territory, it is obvious

Reagan's msensitive policies any cause exactly the kind of disen-chantment with the United States that a more subtle approach could casily avoid, and that this may provide the Russians with the onlycomfort they could possibly hope for.

no rockets.

Nor will most of the world feel much concern for Col. Qadhafi, given the ugly character of his regime, with its export of terrorism and its bullying aggression in neighboring Chad. The Libyan accusations that the United States was engaged in high-handed lawlessness can be discounted.

Is there any geographical justice to the Libyan contentions? Since 1973, Libya has drawn a base line across the Gulf of Sidra and claimed that it lies entirely within Libyan territorial waters. No, the United States has consistently maintained. Everything that lies beyond the three-mile limit properly constitutes international waters.

but in this chastened era, Americans need doubly to be reassured.

So there are questions. If Washington's charge of aggressive action is unanswerable, why not make it before the UN Security Council? What consideration has been given to the safety of some 2,000 Americans, most of them oil company employees, still living in Libya and within Col. Qadhafi's reach? Was the challenge timed in collusion with Egypt or Morocco, Libya's North African adversar-

Giving a black eye to Col. Qadhafi won't hurt U.S.'s global standing. It might even help. What would hurt is even a trace of deception.

THE NEW YORK TIMES.

Questions After the Dogfight

To the Libyans, it was, presumably, an at-tempt to assert their claim of sovereignty over an expanse of open sea reaching from their sbores most of the way to Italy. To the U.S. Navy, it was a matter of keeping the open seas open. To the Navy pilots, it was a reflexive response to shoot when shot at. Sensible people never take pleasure in seeing these weapons used. There will be, necessarily, much inquiry into the origin of this incident, and whether it might have been avoided. The question is altogether proper, but it may well turn out that, realistically, there was no way to avoid this kind of collision with the world's most utterly reckless government.

The Libyans, under the energetic leadership of Col. Moamer Qadbafi. are running a sort of pirate kingdom that recognizes no law but its own. It is characterized by unbounded ambition, extreme naivete, and the inordinate wealth generated by its oil fields. That's an uncomfortable combination, particularly for the countries nearby. Libya's troops bave pushed down into its defenseless neighbors in Central Africa. The Sudanese have openly called for the overthrow of Col. Qadhafi. His feud with Egypt, which he once tried to invade, has gone on for years. In several European countries. as well as in the United States, the Libyans bave been running -

usually through their diplomatic missions a systematic campaign of assassination of the colonel's enemies. Some of the oil money is being used to buy an immense arsenal of advanced weapons. Some of it is being used to try to develop nuclear weapons. Libvan purposes and practices cut across the basic rules of civilized conduct at so many points that Wednesday's exchange of fire is, unfortunately, merely part of a larger pattern.

Further questions: What, precisely, was the Libyans' purpose in sending out the planes? Why use these Soviet planes, inferior to the U.S. fighters, when Libya has better ones? Why, after a number of Libyan planes approached the carrier force and veered off. did one of them choose to fire? Can it be proved that the Libyan fired first? Whn, incidentally, was flying those planes? Not many of Libya's jet pilots are Libyans.

A decent respect for international law on the U.S. side, if not Libya's - requires an earnest effort to extract as many answers, publicly, as possible. But there is no country anywhere that will have less benefit of anybody's doubt than Libya. The single useful purpose that the Qadhafi regime serves is to remind people what the world would be like if there were no law. and no law enforcement, among nations.

Seventy-Five Years Ago August 21, 1906

PARIS - A letter to the editor reads: "As a constant visitor to Paris. I am compelled to notice the great increase of a growing nuisance here. It is a surprise to see that so many beggars (purely professional) and American swindlers are permitted to annoy Americans - for they never attack natives - on the streets. On one walk, I encountered 14 beggars. Eight of these were filthy, dirty women carrying borrowed infants, four were young children under 12 years of age, and the remaining two were maimed men. Americans are accosted every day by glib-tongued young American men who have hard-luck stories to tell. They beg their countrymen to advance assistance until the money cabled for arrives."

Fifty Years Ago August 21, 1931

PARIS - Today's editorial in the Herald reads: "Dr. Charles Craster, American protagonist of an "anu-kissing crusade" has a far better field for proselviism in his own country than in Europe. Kissing on the lips by far is too prevalent a custom in the United States. Gradually the insanitary nature of the practice has been inculcated in the minds of the people at large. To those who are accustomed to the cleaner habit, kissing on the check. lip-kissing is veritably disgusting. Producers of the screen-pictures ignore the fact that the prolongation of the ultra-passionate kiss is deeply offensive to persons who ask only to be decently and sanely amused and must quit the theater in a censorious mood."

The operator told me I could take the matter up with a supervi-sor. The supervisor identified herself as a Mrs. Sundae. She asked me the problem, and I explained it to her in what I thought were ad-mirably lucid terms. She said she herself could not make the change in the records. That had to be done hy the husiness office. She would ask them to call me.

About an hour later, after I had called Caputo and arranged to play tennis, another call came small motel. He also is studying English and has taken an English through. A woman's voice said the call was from something I didn't quite hear. She was looking into a complaint from a Mr. Crash is an interesting one. Unlike the graduate and post-graduate stu-dents (largely in technical fields) (which I deduced was me) about a Mr. Computer (which f figured to be a translation for Caputo). There who have arrived in the United States as part of official Chineseseemed, she said. to be some error in the accounts. Something about U.S. exchange, (or, as the Chinese say, gung fei, literally, at "public expense"). Mr. Zhang has arrived her use of the word "accounts" caught my anention, and I asked her if f was correct in thinking she was calling for the telephone com-pany. She said: "Of source not. I work for ... " and then she gave the name of a hank. I told her I on his own. He is part of a largely unreported hut increasingly large number of Chinese students who thought we had better forget the whole matter. Then f went ont to play tennis with Mr. Caputo.

"Have f ever got a story to tell you," Mr. Caputo said when we met at the court. He had been called at his home by Mrs. Sundae. She told him about the mixup in the phone listing. He said he knew about the mixup, and had been trying to have it fixed for some time. She said he should call the husiness office and gave him a number.

Xinjiang Viewed From Orange County

By Orville Schell

ten left wives and children behind tying them to China, younger "pri-vate expense" students are often unmarried.

Chairman Mao Tse-tung, and in While their patriotism is deep, spite of having spent seven years of his life as an "educated youth" they are able to confront the question of whether or not to return home with greater freedom. And what is notable about this growing exiled in the isolated westernmost province of Xinjiang, he is now living in California's Orange County. number of post-Cultural Revolution Chinese youths is their disilla-sionment with their homeland, a He incongruously shares an apartment with another student from Taiwan, and has become an disillusionment which is so deep that few wish to return. ardent Catholic and a devotee of

The following is one of a long series of letters I recently received from Mr. Zhang Tungshu, now Oswald Zhang, I have translated it from Chinese:

My Dear Friend:

How complicated and dangerous How complicated and dangerous everything in China now seems to be. Recently, I have heard that August will bring an even bigger crackdown against so-called "dissi-dents." More than ever before it is. difficult to see into the future and be able to see into the future and be able to speculate about how all the political forces which have been set in motion will finally work themselves out. Everything seems to be floating in confusion and without focus. This pitiful naarrive from the People's Republic tional entity called "the Chinese people" are, as so often in the past, without direction. Like the great Yangtze River which, after carrying so much eroded soil in its wa-ter for so many thousands of years, its color changed from blue to yellow so that no longer can one look into its depths and distinguish the false from the true or the ugly from the beautiful, so China's inner purpose has now been ob-scured. Like the Yangtze, China, too, now flows aimlessly, oblivious of any final destination.

"Chairman Mao is the red sun in our hearts!" "Chairman Mao is our Great Helmsman!" "Long live Chairman Mao!" As young people we believed it all. We didn't know anything else. But when we finally began to realize that Mao was not just the idealist we thought, but also a tactician using China's young people in a power struggle toward his own ends, it was devastatingly disillusioning. We were left with nothing to grasp onto, nothing to believe in except materialism. But what is materialism in

a country which cannot produce enough material goods. It would not be too extreme to say that the Cultural Revolution left us with nothing; that it was ut-terly without any redeeming graces. Whatever it succeeded in accomplishing will never make up for the fact that it destroyed the people's adoration, trust and confidence in their leaders.

Our country is now bereft of idealism. Only when and if the Chinese people, the real source of China's energy, are able to regain a new sense of idealism and a willingness to sacrifice, will our country be able to regain a sense of hope. But sometimes I think sadly that China has come to the end of its ability to believe for now. So many times in the past 30 years china's idealism has appeared, only to be crushed by the twists and turns of [Communist] Party politics. Now it will be more difficult than ever to re-establish. What is there to hope for? Almost every young student my age wants to come abroad and escape. It is like an obsession. We feel that

-. ...

we can do nothing at home until the old generation of leaders who I was raised on Chairman Mao. talk on the one hand of moderniza-

past by warring factions and the blood and bodies of the Chinese people? I see no exit. I long to write something about what I have some But why do I yearn to do some thing so useless? For in my heart i know that writing will in the end, constitute little more than a useless record. It will not change human nature or China.

Already I have no more tears for my country. Long ago my heart has withered and hardened to its problems.

Sincerely, Zhang Tungshu

a Brink

A. Ciniq.

MOSCOW - Fly to Moscow, catch a taxi at the airport and something curious about this soci-ety is visible right away: If power corrupts, it does so just as surely behind a steering wheel as anywhere else.

In a country that boasts of its social discipline, the roads are a jungle. The Soviet Union has its highway code, its traffic police, its radar traps and its driver's license penalties. But, in the end, it is power that counts: If you have it, you can get away with almost anything. If you don't, better stay in the slow lane

In the world of the Soviet automobile, power has a color. All Communist Party and government cars — about 80,000 in Moscow alone, and a quarter of all vehicles on the road - are black.

With few exceptions, they are driven by young men with muscled forearms, leaden accelerator feet and sideways glances for lesser mortals that suggest something worse than a 10-ruble fine.

Nominal Restriction

and a family friend, wrote Sir Gladwyn Jebb, later Lord Gladwyn, at the end of the war. suggesting he might find Maj. Urquhart of some use. Sir Gladwyn, working from a small office behind Westminster Abbey, was setting up the UN Secretariat. Mr. Urquhart was the second man he hired.

Page 5

Since then, Mr. Urguhart has closely worked with all the UN secretaries-general, beginning as a personal assistant to Trygve Lie. For all Mr. Urquhart's frankness, For all Mr. Urquhar's trankness, he is intensely lnyal and finds ad-mirable qualities in all the UN chiefs — the integrity of Dag Hammarskjold, subject of a Ur-quhart biography, the courage of U Thant and the political sensitivi-ty of Kurt Waldheim.

"We haven't achieved one-bun-dredth of what we could have." Mr. Urquhart said, "but every now He blamed the July crisis in and then something goes right."

Things went mostly wrong in the Congo in 1960, he said, when the UN tried to prevent Katanga prov-ince from seceding. "We didn't fnresee that the real problem was a split along East-West lines," be

The Congo affair might have ended sooner and with less bloodshed, he said, "if we'd been less eager to tie things down, if Ralph Bunche and Hammarskjold hadn't tried to impose their ex-tremely high standards of behav-ior, the sin of arrogance." Mr. Bunche was Mr. Urquhart's superior at the time.

Some historians have blamed U Thant for bowing to President Gamel Abdel Nasser of Egypt and withdrawing UN forces from the Sinai in 1967, a move that was shortly fullowed by the Arab-Israeli war. But Mr. Urquhart is con-vinced that Nasser was "bent on fugeees as early as 1933 and gave massive self-destruction."

Now there's something from Philips that makes work much easier for the secretary, the boss and even the head of a small firm.

Judge Shoob and other federal judges has raised questions about many of the immigration service's determinations and the govern-ment's handling of all the imprisoned refugees' cases. Judge Shonb has characterized the government's performance in those cases as a

dows.

Canada Panel Urges Laws Against News Monopolies

By Henry Giniger New York Times Service OTTAWA - A Canadian gov crament commission, born out nf the "shock and trauma" of two major newspaper closings a year ago, has urged tough measures to limit concentration of ownership and enhance the quality and independence of Canadian newspapers.

(a))157

After a year of study and public hearings, the three-member commission painted a dismal picture of an industry in which quality is being sacrificed to profit and whose already "monstrous" concentration is likely to grow "unless law and public policy are changed."

The proposals "for freeing the press in Canada," which include a new Canada Newspaper Act, came under strong attack, particularly from members of the two chains most directly involved, Thomson Newspapers and Southam Press. Both chains are now under indictment for conspiracy to lessen newspaper competition.

The Southam-owned Edmonton Journal, which dislikes Prime Minister Pierre Elliott Trudean in gen-eral, declared that he had "an obsession with taming the press" and said: "The recommendations of the commission amount to an extension of the philosophy of a Liberal government that is totally dedicated to intervening in every phase of the economy."

Death of Competition

ness are greater than the assets of the newspaper being sought. The Thomson company is nwned by Kenneth R. Japanese Painter Winning Battle for His Own Style

Art

By Henry Scott Stokes

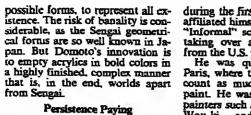

New York Times Service I painting in the Western style is dominated in Japan hy artists wbo imitate the French Impressionists and Post-Impressionists. ther e's a great amateur tradition as well. On a pleasant weekend, peo-ple flood in with their easels to paint picturesque corners of the Imperial Palace, with its moats and pines and stones.

Almost all the serious young modern artists who can afford to do so have fled this nostalgic climate to New York, where Japanese artists are said to number up to 1.000. But in time many are likely to return, to rediscover a graphic tradition that has few rivals in the history of art.

In Japan, artists are expected to pay galleries for the space to ex-hibit, and the fees are high. Painters form cliques partly for self-pro-tection, and their members model their work on one another rather than functioning independently. A group ethic that seems an anathema to art takes over.

But there are exceptions, whom the most conspicuous in Tokyo now may be Hisao Domoto. This painter is trying to do some-thing very difficult: His aim is to borrow a zen iconography that was perfected hy the early 19th-century master Gibbon Sengai. Sengai re-duced artistic form to the ultimate simplicity of the circle, as an abstraction from the mountains and clouds painted hy traditional Japanese artists up to that time.

Domoto's intention to borrow from Sengai is exemplified by his use in large acrylic paintings of a circle-triangle-square combination that Sengai made to encompass all

Now, after half a dozen exhibiions, including two successful shows in Paris in 1979-80, Domo-to's persistence may he paying off artistically. His latest exhibition at Osaka just closed and, with the support of the Japan Foundation and the Fuji Television Gallery, he's considering showing his work

New York for the first time since 1968 He is encouraged in this goal by favorable reviews both in Japan and in Paris. After his Osaka show, the critic of the newspaper Asahi wrote that "Domoto has the knack of creating space that breathes." The critic of the newspaper Maini-chi praised his paintings for their "vivid sense of movement — in contrast to a younger generation of abstract painters here whose highest aim appears to be to produce

wallpaper "I'm ready now," Domoto said of the prospect of a New York show. "It just depends on finding

the right gallery. The financial backing is there already." But it may be some time before New Yorkers see his work. He is in no hurry, preferring to wait two

during the first half of that period affiliated himself with the so-called "Informal" school of abstraction from the U.S. painter Sam Francis. He was quickly successful in Paris, where the social graces can count as much as the ability to paint. He was friends with rising painters such as Soulages and Zao

Wou-ki, and quickly spotted emerging young artists such as Szafran and Christo. Rich hy the standards of the Left Bank, handsome, gregarious and technically gifted — and ready to lend money - Domoto was popular among fellow artists. He turned his back on Paris af-

ter 10 years, feeling that he did not share the cultural heritage of a

Jean Dubuffet. Europe was not his. Furthermore, his efforts to create a style of his own, which he dubbed solutions de continuite, were not appreciated. He still has thick folios full of unsold work of that period, including some beautiful sketches of opposing vertical masses to right and left with serrated edges and gaps in the middle.

The painter likes this work, The painter nices in work, flipping through the folios with zest, sighing over one in five. But his former dealer in Tokyo, Kusuo Shimizu of the Minami Gallery, where be had half a dozen shows, told him these paintings resembled ing they deserved to be walked or

stamped on. The Stadler Gallery, his dealer in Paris, was equally hostile; only the late Martha Jack-son in New York sold the works. years if necessary to be sure that an exhibition — preferably a re-trospective — happens in the right place at the right time. Time is not the real consideration, taste is. Domoto, who comes from a well-known family of traditional painters, abandoned oil paint, con-

Domoto, 53, has, by his own ac-count, switched styles drastically tending that "it's not suitable for Japanese artists." He has used only over the years. He went to Paris acrylics for a decade now, he addfor 10 years starting in 1955, and

With the change in med came a third change in style, if counts his period as a tradition in his youth, when he won m state prizes. His canvases now huge, shimmering and bright, interlocking circles - an ech Vasarely - and are dominated the Zen motifs of the circle and circle-triangle-square.

Fashions, Failures

Do they work? As the Br artist Francis Bacon has said. 50 years or 70 years before any really knows whether a given a has succeeded. There are fash and failures. Domoto's search f style is one of the most adver ous in Japan: It is ambitious, k ly - he has few supporters am artists here - and suggests a pacity for development using t itional idioms. There are two aesthetic tr tions in Japan over a millennin the spare, the sometimes aus the intimate, as with Ser and

who favored maximum econo of expression; and the gorge the decorative and the rich, as the gilded screens of the late fe times, the shrine to the sho Icyasu at Nikko, and the kimon Buthow to utilize the ideas Sengai and still use a rich rang colors and complex geometry forms, and create paintings which every inch of the surface filled with detail --- in short,

to unite the two traditions? That is what Domoto tries to and it is a measure of his ambit His shimmering canvases evol nuclear reactor's core. Domo work, which appears at first me decorative, also has some day or poison at its core — a mean of art, the novelist Yukio Mish said.

THREE STRAFT

another go at yet another play. He was somewhat hurt and saddened by the reception accorded "Clothes," and he says he is all too aware of the "declivity of my reputation." Still, he points out, he has always been a survivor: hc survived the time his first play was booed off the Theatre Guild's stage in Boston; he survived the 'disastrous decade of the '60s.' when drink and drugs and poor reviews darkened his career and life; and at 70 years of age, he has ap-parently survived the disappointment of "Clothes" as well.

On Aug. 24, "Something Cloudy, Something Clear" will have its premiere at the off-off-Broadway Jean Cocteau Repertory Theater, on the Bowery, and last week, the playwright sat at a near-by restaurant with Eve Adamson, the director of the play, and re-flected a bit on his latest creation and his life. Dapper in a blue hlazer and a white shirt set off by amethyst cuff links, the playwright death and loss, punctuating his conversation with a nervous, tremulous laugh. Laughter, as he once wrote, "has always been my substi-tute for lamentation."

"Something Cloudy, Something Clear," says Williams, is "one of the most personal plays I've writ-ten — it released for me some of the emotional content of my life." Set in Provincetown in 1940, it is based closely on the playwright's own experiences during that "piv-otal summer when I took sort of a crash course in growing up." He was 29 at the time and, as he writes in his "Memoirs," had just "come thoroughly ont of the closet." He was also on the hrink of becoming a successful playwright, having re-cently received a Rockefeller grant and a Theatre Guild contract for "Battle of Angels."

Memories of Provincetown

It was in Provincetown that Williams met such local luminaries as Tailulah Bankhead and Jackson Pollock, and it was there that he met his "first great male" love — a young Canadian draft dodger named Kip. The two lived together briefly in a two-story shack on Captain Jack's Wharf until one day a girl entered the picture, and Kip told the playwright that their affair was over. Williams left im-mediately for Mexico; he learned later that Kip was dying of a hrain tumor

A similar story is related in "Something Cloudy. Something Clear." Although a woman who is the mistress of a New York gang-ster has been added and Williams' name has been changed to August, the plot remains surprisingly faith-ful to the actual story. "It's a memory play," says Adamson. "By the end of the evening it's very clear that August is existing in two time frames at once — as the young man in 1940 and as an older man today. The action is largely internal - it really takes place in the consciousness of the playwright."

they all kept evolving. I think one tends to think more abstractly as one comes to the end of life --- the day-to-day things that concern us in our middle years are perceived differently."

differently." Indeed Williams, whose work has always relied to a degree on poetic symbolism and the power of mood, has departed increasingly from the pseudorealism that dis-tinguished his early, popular work. Since his last big commercial suc-cess with "The Night of the Iguana," in 1961, he has moved toward a more impressionistic form, in which time and memory have become the dominant motifs. The

Arts Agenda

This are a the second state of the second stat . . .

CHINA — The Boston Museum of Fine Arts is sending an exhibition of American art to Chica mad menth, the first under a cultural agreement signed in 1979. The 70 paintings, all from the messent's collection, include works by John Singleton Capley, Window Homer, David Gimour Biyths, and such con-temporary artists as Jackson Pollock and Morris Louis. The show will open Sept. 1 in Paking for a month, and then move to Shanghoi Cet. 20 for a month. oi Oct. 20 for a month.

"Clothes for a Summer Hotel" similarly wandered through the past and present to recount the story of the doomed Scott and Zelda Fitzgerald. **Taking More License**

Why has Williams moved in this direction? "There comes a time when you want to give yourself more license," he says, laughing. "Though you often take more than the critics will allow. I felt I had acquired a craftsmanship that enabled me to do it, and there was also that pivotal period in the '60s when I went on speed and my

mind started going too fast for the typewriter. The work was different after that." Besides, he adds, he has become

increasingly conscious of time and its function in his own life. "There's a coeval quality to events as one gets older." he says. "The past and present begin to merge. You also realize time runs short — it runs out on you. Even now, I've been working three hours in the morn-ing and three in the afternoon. It's wrecked my nerves, but I feit I had to complete certain things because I felt time was limited." Certainly the last year has been

a husy — and productive — one. Since the Broadway closing of "Clothes," Williams has rewritten the play twice, and is now hoping for a production in London's West End. In addition, he recently com-pleted an adaptation of Chekhov's "Seaguli" for the Vancouver Play-house and plans to fly to Canada to supervise its production.

"I'm very conscious of my de-cline in popularity," he says, "but I don't permit it to stop me because I have the example of so many playwrights before me. I know the dreadful notices Ibsen got. And O'Neill - he had to die to make 'Moon' successful," referring to "A

Moon for the Misbegotten." "And to me it has been providential to be an artist, a great act of providence that I was able to turn my borderine psychosis into creativity — my sister Rose did not manage this. So I keep writing, I am sometimes pleased with what I do - for me, that's enough."

Audubon Book

Back at Library

The Associated Press PEABODY, Mass. – A \$250,000, 90-pound volume of Audubon's Birds of America stolen in June from a glass case at the Peabody Institute Library has been recovered. The 26-hy-39-inch leather-

bound book containing the works of naturalist John James Audubon was returned to the library by the FBI and state and local police. No

arrests were made. The volume was one of a set of only two dozen still in existence, according to authorities. Birds of

America was published in 1831 and contains 105 pages of prints hy Audubon. The book is minsured due to high premiums.

Dance

An Exuberant 'Romeo' at Edinburgh

By Noel Goodwin

International Heroid Tribune E DINBURGH — Clashing swords and flashing feet in "Romeo and Juliet" brought the debut of the San Francisco Ballet at the 35th Edinburgh Festival, its first appearance in Western Europe. The three-act ballet, in choreography by the company's co-director Michael Smuin to the familiar Prokofiev

co-director Michael Smuin to the familiar Prokofiev music, is mixed with three programs of assorted short hallets for the festival visit, which runs through Aug. 25 at the refurbished Playhouse Theater. Although other versions of "Romeo and Juliet" in different productions by Kenneth MacMillan and Rudolf Nureyev to this music have been a regular part of the London repertory for many years, it is more than 25 years since the ballet was last staged at Edinburgh, where a crowded first-night audience gave a cheering welcome to the exuberant vitality of the dancing. The visitors have a strong sense of en-semble, as betits the oldest professional ballet compa-ny in the United States, having originated in 1933. Baried Contumes

Period Costumes

While fully costumed in colorful period style (by William Pitkin), it looked as if only part of the scen-ery could accompany the production, such scenes as the duct for the lovers below the balcony having to be danced on a bare stage with black drapes. That they were able to carry this to the audience speaks for the talents of Jim Sohm and Diana Weber in the title roles, even if the mechanics of technique were at times overly visible in the serviceable but not very imaginative choreography.

What it lacked particularly in Smuin's version is a sense of dramatic purpose to link one scene to the next and build the human tragedy. Instead of star-crossed lovers beaten down by fate, they seem a cou-ple of adolescents who make rather a mess of things, especially as Juliet's mother is not above carrying on with cousin Tybalt, and her father takes quite a shine to Romeo's erstwhile girlfriend Rosaline.

In one respect this production goes further than MacMillan's for the Royal Ballet in having the street life of Verona revolve around groups of harlots in-stead of just one trio, these being divided into sup-porters of the rival families. And they must be un-commonly liberated ladies in old Verona for them to commonly increated names in our vertical to intern to engage in almost as much swordplay as their men-folk, though a showpiece pas de deux for two street dancers was brightly performed by Nancy Dickson and David McNaughton.

and David McNaughton. Other individual performances to catch the eye were Attila Ficzere as a Mercutio with a lively sense of humor as well as nimble technique; Vane Vest, a hot-blooded Tybalt given to sudden flashes of tem-perament or indiscretion, and Anita Paciotti as the aforesaid Lady Capulet with more than a passing in-terest in her nephew, and who beats her breast over his dead body in the best Bolshoi tradition.

For Edinburgh the San Francisco visitors have the BBC Scottish Symphony Orchestra in the pit, con-ducted in Prokofiev by the company's music director, Denis de Coteau. The playing was secure and responsive in detail, giving strong support to open the San Francisco company's season here.

BUSINESS/FINANCE

BUSINESS NEWS BRIEFS Soviet Union

Royal Dutch-Shell Profits Off 75%

LONDON --- The Royal Dutch-Shell Group said Thursday that its earnings in the the second quarter fell more than 75 percent from a year earlier but added that results were distorted to an exceptional degree by U.S. accounting regulations.

The company reported second quarter net income fell to ± 164 million from ± 680 million a year ago. The company took a loss in currency conversion of ± 322 million, against a ± 90 million gain a year earlier. Shell said that Shell Oil of the United States reported second-quarter earnings of \$410 million, but that on conversion to sterling moder U.S. accounting procedures, this became a net loss of £195 million.

Norway Issues Licences on 9 Offshore Areas

The Associated Pres

OSLO — Norway issued new licenses Thursday for oil exploration in nine sections of the North Sea field. Norske Conoco, Elf Aquitaine Norge, Esso Exploration and Produc-tion Norway, and Norske Shell were given roles as operators on four of the sections and Norwegian companies Norsk Hydro, Saga Petroleum and Stateil on fun others and Statoil on five others.

and Statoil on five others. Norske Conoco was also granted a 7.5-percent participation in each of three sections to be operated by Norsk Hydro. Norway set as a condition for all Norske Conoco's licence holdings that Du Pont — which recently acquired Conoco, the parent of Norske Conoco — guarantee Conoco's obligations on the Norwegian continental shelf.

BASF Says Costs, Dollar Cut Profits

Revers LUDWIGSHAFEN, West Germany — BASF said Thursday that world group pretax profits in the first half of 1981 did not match rising turnover principally because of higher raw material and energy costs resulting from the decline of the Deutsche mark against the dollar.

But the company said that the year-to-year drop in profits was not as pronounced in the second quarter as it was in the first quarter of 1981. BASF figures show second quarter pro-tax income fell 4.4 percent to 391 million DM from 409 million DM a year earlier. The drop in the first quarter was 8.8 percent. Earnings Page 9.

Bankers Trust to Sell Credit Card Operation

New York Times Service

NEW YORK - Bankers Trust New York, as expected, announced Wednesday that it will sell its credit card business, which is part of the Visa system and is one of the 10 largest in the United States. The bank holding company also plans to sell four upstate New York commercial banking subsidiaries. in the financing and for the West German Economics Ministry said Thursday that they were unaware of the development.

The divestiture would substantially complete the company's previously announced plans to withdraw from retail banking, according to Alfred Brittain 3d, the company's chairman. Bankers Trust New York is the parent of the Bankers Trust Co., the nation's eighth-largest bank, which would not be affected by the moves.

American Express Decides Not to Sell Bank

New York Times Service

NEW YORK - American Express, which had been considering the sale of its American Express International Banking subsidiary, said Wednesday that it had decided against such a sale and had accepted the resignation of Richard M. Bliss, the head of the subsidiary, who opposed

James D. Robinson 3d, chairman and chief executive officer, said American Express had decided to retain the subsidiary when it could not find a buyer willing to pay its "high price standard." Mr. Bliss believed American Express should sell the bank because by owning an insurance company, American Express is barred by U.S. law from operating banks in the United States.

S. Africa's Escom Awards \$1 Billion Contract

LONDON - South Africa's electricity supply commission, Escom, has given a \$1 billion contract for coal-fired boilers to Combustion Engiyear plan, investment in the gas in-dustry, most of it in Siberia, is to be 20 billion rubles, twice the amount invested in 1976-80. neering, the contractor's financial adviser Hill Samuel and Co. said Thursday. This is the first contract for Escom's new 3,600-megawatt power station, it said, adding it has already arranged financing.

Middle East Airlines Delays Airbus Purchase

BEIRUT — Middle East Airlines Thursday postponed a decision on buying five wide-bodied Airbus A-310 jets until September because nf recent unrest in Lebanon and the Arab world, managing director Scim Salam said.

The airline initialed an agreement to buy the planes, worth \$350 million, last November. The deal, including an option on 14 more planes, was to have been signed in March, Mr. Salam said. He added that the sed to by Airbus Industrie.

On Gas Field Sales to Europe Seen

From Existing Area

New York Times Service . NEW YORK - The Soviet Un-

ion, in a shift of its natural-gas strategy, has disclosed that it is de-laying the development of a new Siberian field that was to be a ma-

jor supplier of gas to West Germa-ny and other Western European countries

Instead of proceeding with development of the proposed Arctic field, known as Yamburg, Soviet planners have decided to concentrate efforts on the huge Urengoi

field, 150 miles to the south. Urengoi, the largest gas field in the world, has been producing gas since 1978. Under the five-year plan for 1981-85, its output is scheduled to rise from 1.75 trillion cubic feet last year to 8.4 trillion in 1985. If the goal is met, this single field would yield the equivalent of 40 percent of all of the United

States' output of natural gas. It would thus meet growing So-viet domestic needs and, presumably, any additional export commit-ments arising ont of the deal being negotiated to pipe natural gas to Western Europe. Spokesmen for Ruhrgas, the West German firm leading the ne-gotiations, for the banks involved

Mr. Dinkov said tion that settles most option transactions for the exchanges by col-lecting the shares from option sellers and delivering them to investors who exercise options to buy shares. this would save 1 billion rables

The clearing house decided Tuesday to shortcut the usual proceedure because it could not get enough Conoco shares to deliver to investors who asked for them, said Mark Berman, senior vice presi-dent and general counsel of the **OCC.**

industry is to install the pipelines needed to move the gas from the producing region to the European part of the Soviet Uninn and on Instead of the stock, investors who exercised their Conoco np-tions will get \$92 a share - the into Eastern and Western Europe. A transmission capacity of 5 trilsame amount they would have received if they had got the stock and had been able to sell it to lion cubic feet a year was in place last year as West Siberia produced scagram, which was bidding against Du Pont and Mobil for Conoco. one-third of the Soviet natural gas output of 15 trillion cubic feet.

The transmission of 7 trillion The \$92 a share in cash will be more cubic feet of gas a year from Siberia will call for an intensive paid to persons who asked for depipe-laying effort, involving six pipelines 56 inches in diameter to-taling some 12,000 miles with 174

Grand Met Confirms It Is in Negotiations

Pan Am Considers Sale of Its 'Crown Jewel'

It logged pretax earnings of \$23.8 million on operating revenues of \$136.7 million for

years and its position in the industry have drawn praise from analysts. "In the past 10 or 12 years, competition has increased, but Intercontinental has done well in the face of it," said Daniel R. Lee, leisure industry analyst with Drexel Burnham Lambert, who was formerly with Hilton International. "They run good hotels."

Janney Montgomery Scott, said Intercon-tinental "has been a nice source of earnings, but up until the last few years, it wasn't as profitable as some of the international chams, such as Hilton International," mainly because "many Intercontinentals were in iso-lated regions." He said, however, that in re-cent years, Intercontinental's expansion "has been not so much in underdeveloped areas."

Service World International, a hotel industry publication, calculated late last year that intercontinental's total number of hotel rooms operated — the current figure is 30,400 — put it in 15th place among butel companies with operations in more than one country. First place was held by Holiday Inns, with 303,578 rooms, one of Intercontinental's chief rivals, Hilton International, was in 16th place with 29,485.

Roots in Brazil

A network was what Juan Trippe, then Pan Am's president, had in mind when Intercontinental Hotels was formed as a wholly owned Pan Am subsidiary in 1946. Mr. Trippe had been urged by President Franklin D. Roosevelt, according to Intercontinental, to help promote tourism and trade to Latin America

The organization began with a hostelry in Belem, Brazil, and grew to 14 botels within a decade. In 1961, long before the Middle East oil boom of the 1970s, Intercontinental opened its first Middle East hotel - in Beirut - and it now operates nine in that region, with four more being huilt.

In the 1960s, Intercontinental moved into Eastern Enrope, beginning with a franchise hotel operation in Zagreb, Yugoslavia; and started new operations in the Far East, Aus-tralia, Africa and elsewhere in Europe.

During the 1970s, while Pan Am's for-(Continued on Page 9)

Clearing House Settles All Conoco Options With Cash

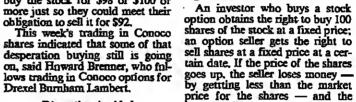

market. The buyers will not lose any money as a result of the deci-sion, but the sellers could save quoted at \$83. Mr. Berman said the unprece-dented action by the clearing bouse was meant to avoid the adcided to settle options transactions in cash to avoid disrupting the market in Conoco shares.

verse effect of a short squeeze," a situation similar to cornering the market in Conoco options. Had the OCC not stepped in, had the OCC not stepped in, persons who promised to deliver Conoco stock would have been forced to do so — at any price. They could have been forced to buy the stock for \$98 or \$100 or more just so they could meet their obligation to sell it for \$92. This week's trading in Conoco ing the shares.

This week's trading in Conoco shares indicated that some of that desperation buying still is going on, said Hnward Brenner, who fnl-

Du Pont won the fight for Cono-co by offering to trade 1.7 shares

of its stock for each share of Conoco; therefore, each share of Conoco ought to be worth 1.7 times as much as a share of Du Pnnt. At yesterday's prices, 1.7 shares had sold an option of Du Pont could be purchased for ' to someone else.

Disruption Avoided

Market analysts said the short squeeze in Conoco developed because investors sold stock or options on stock that they did not own, or agreed to sell stock to Seagram although they already had sold an option for that stock

Half-year report 1981

buyer profits,

Here is how an investor could get "squeezed" in the Conoco opabout \$75, hnt Conoco shares were

tions trading: Mr. Berman said the OCC de-Someone who owned Conoco stock saw the price going up as Du Pont, Seagram and Mobil began trying to buy the company. Instead of selling the stock, the holder tried to lock in a profit by selling an option on the shares. Stock option transactions frequently are settled in cash anyway.

But many Conoco options inves-tors decided to exercise their options and take delivery of the stock When Seagram bid \$87 a share because they apparently thought there was a better chance to make money on the Conoco deal by havfor Conoco, the stockholder accepted the tender offer and sent in the shares, figuring the profit from the sale to Conoco would more than offset the loss on the options sold. The investor who bought the option would be entitled to the difference between the option price and whatever the stock was selling

for when the option expired. Instead of settling for the cash, however, some options buyers demanded the stock, apparently bop-ing it would continue to increase in

If the OCC had not mandated a cash settlement, the stockholder would have been forced to bid whatever the market demanded to get the stock and deliver nn the op-tion.

The Investment Company Institute said Thursday that assets of money market mutual funds rose \$2.5 billion in the week ended Wednesday to \$145.2 billion. Since the first of the year, mon ey market assets are up \$70.6 billion, it said.

In corporate news, Mesa Petroleum told the Securities and Exchnage Commission that it has increased its holdings in Cities Service to a 4 percent share.

Fed Sets Up Program To Aid Banks, Thrifts

WASHINGTON - The Federal Reserve Board on Thursday estab- funding members' liquidity lished a sliding scale of interest rates, ranging from 14 to 16 per-

cent, for a special loan program designed to help banks and thrifts suffering "sustained liquidity problems" brought on by market

The central bank has had the program at its disposal since last year, but has never used it and never set rates before. A Fed **Oil-Glutted Japan to Cut Imports by 5%** spokesman said the board decided. to set rates now because there have been "several" requests recently for aid under the program. The Fed said its basic discount

rate of 14 percent and the 4 percent surcharge assessed frequent users of the discount window were filled to capacity and domestic demand for oil falling, Japan an-nounced Thursday that it had re-duced its crude oil import target not affected by Thursday's deci-sion. Under the liqudity problem loan program, the Fed will charge. for the current financial year by almost 5 percent. 14 percent for the first 60 days of borrowing, 15 percent for the next 90 days and 16 percent thereafter.

The program will be available to both commercial banks and thrift institutions, the Fed said. The Fed said Federal Reserve

banks in Dallas, Philadelphia and New York had requested that rates be set for the liquidity problem

loan program. Richard Pratt, chairman of the Federal Home Loan Bank Board, also sent a letter to Fed Chairman Paul Volcker, saying: "It is now desirable and prudent for the Fedif the Saudis raise their price from \$32 as part of an OPEC price unification agreement, oil industry sources said Thursday. eral Home Loan Bank system to

INTERNATIONAL HERALD TRIBUNE, FRIDAY, AUGUST 21, 1981

Wall Street Expects Widening of '82 Deficit

By Michael Quint New York Times Service NEW YORK - Wall Street, de-

spite Reagan administration state-ments that the federal budget deficit will not increase much beyond predicted levels, seems to have concluded that the administration will fail in its goals of holding the 1982 budget deficit to \$42.5 billion and balancing the budget two vears later. An administration official said

earlier this week that the deficit might exceed the target, but the nation's investment community had reached a similar coeclusion long ago. Many analysis say that larger-than-planned deficits, of perhaps \$60 billion, could prevent or at least delay the long-awaited decline in interest rates. Presiden-

tial spokesmen said Tuesday that while there might be some "up-ward creep" in the deficit, it will not be of the magnitude being discussed by analysts. But fear of heavy borrowing by the Treasury and by federal agen-cies to finance deficits is an important reason wby long-term Treasury bond yields are hovering around a near-record 14 percent,

compared with 12.1 percent when President Reagan took office. Even those analysis who expert lower interest rates during 1982 warn of serious problems before the declines begin. The next seven months are espe-cially critical for interest rates, an-

alysts say, because Treasury bor-rowing needs of more than \$30 bil-lion in the fourth quarter and an estimated \$35 billion in the following quarter come at a time when B growing economy will mean heavy borrowing by businesses. "I see no way to avoid the clash

between Treasury and private bor-rowings," said Allan Sinai, an economist at Data Resources, "It looks like the economy strength-ened m July," he said, adding that this "threatens accelerated growth in money, tighter Fed policy and

U.S. Cites Damage To Brazil's Coffee

United Press Inte WASHINGTON - Coffee output in the Brazilian state of Sao Paulo --- where 30 percent of Brazil's coffee is grown - will be cut by one-half next year as a result of the mid-July frost, the U.S. Agri-

culture Department predicts. As a result of a field survey by the office of the U.S. agricultural counselor in Brasilia, the department Wednesday said that as many as 50 to 60 percent of the

900 million coffee trees in Sao Paulo were damaged. Earlier this month, the department estimated that the frost on July 20 and 21 reduced coffee production in the Brazilian state of Parana by two-thirds to about 3 million bags.

interest rates sustained at current debt. Monetization occurs when the Fed buys government securi-

The interaction between budget deficits, interest rates and inflation is complex, and does not necessarisbow that large deficits autometically cause high interest rates and more inflution. In 1975 and 1976, for example, although federal budget deficits of \$52.5 billion and \$68.9 billion, respectively. were even more significant compared with the size of the economy then, interest rates declined and inflation dropped far below the 1974 rate.

Complex Interaction

Economists say that the weak economy during 1975-76 meant lessened credit demands by nongovernmental borrowers, which allowed the Treasury to satisfy its oceds without crowding out other borrowers, as was feared

Today, however, they cite two reasons wby the financial markets could have difficulty absorbing the Treasury borrowing, even though the Reagan-estimated fiscal year 1982 deficit of about \$42 billion is less than 1975 or 1976 and despite

a much larger economy. First, as noted, a growing econo-my generates additional credit dends by businesses. Second, the Federal Reserve will

not assist the Treasury as in years past when the central bank no li "monetized" the government's tion.

Pan Am Meets to Ponder Bid on Its 'Crown Jewel'

rooms, while Intercontinental's oc-(Costinued from Page 7) cupancy rate was 69.1 percent for the year. One analyst said that the

tunes fluctuated. Intercontinental expanded including the 1972 founding of its Forum Hotels dividisparity in performances was partly because Intercontinental still has relatively more of its opersion to provide relatively inexpen-sive lodgings. Forum has five botels in operation and plans others.

tively prone to instability. In addition, Intercontinental has been mapping expansion in the United States, where it already op-erates four botels: New York's ly have found themselves at the center of action in world hotspots. Bullets ricocbeted around the Am-Barclay, San Francisco's Mark Hopkins and others in San Antoman Intercontinental during Jordan's 1970 civil war, and revolunio and Hawaii. Others are being tionaries smashed windows at the built in Boston, Fort Lauderdale, Tehran Intercontinental while the Houston and New Orleans, and Shah's regime was being overgrowth is planned for Dallas, Los thrown Angeles, San Diego, Chicago and Washington, D.C. rooms are in the 76 of its hotels

Intercontinental's \$41.6 million that it operates under lease, manin pretax income on 1980 opera-ting revenues of \$273.5 million were 23.6 percent better than 1979's pretax carnings of \$33.7 million on operating revenues of \$259.8 million.

By contrast, Hilton Internation-al in 1980 had pretax income of \$65.8 million on total revenues of \$628.3 million, up 18.7 percent from \$55.5 million on 1979 revenues of \$556.3 million.

Hilton had an overall occupancy rate of 73 percent in 1980 in the 79 bostelries it operated with 28,800 leisure products.

A number of analysis agree with the president that deficits will be not be larger than forecast. Joseph ues, B move that increases reserves Bench, vice president of fixed-inin the banking system and stimucome research at Shearson Loeb lates expansion of lending and Rhoades, said the adminstration's money supply. estimates for the fiscal year 1982

Fed Bought Securities

In the past, the monetization occurred almost automatically because the Fed bought securities whenever interest rates threatened to rise above its targets. Today, the Fed does not set targets for interest rates, and analysis say necessary growth of bank reserves will be so small that the Fed will buy far fewer Treasury securities than in the past

to accommodate Treasury borrow-ing," Mr. Bench said. He noted that the bousing sector alone was borrowing only about \$40 billion "In the immediate future, the absence of the Fed's buying will at an annual rate compared with mean more upward pressure on \$120 billion in 1979. short-term interest rates," said Robert Parry, chief economist at Whatever the impact of Treasury borrowings over the next seven the Security Pacific National Bank. "In the long run, it's a con-structive development," Mr. Parry continued, because slower money months, many analysts doubt that a balanced budget will be achieved by fiscal 1984. Brian J. Fabbri, an economist at Salomon Brothers, supply growth will mean less inflawarned that the credit markets tion and lower interest rates.

might still be shocked and disap-pointed at future government spending. "There is a perception "If future budget deficits are not monetized, they will not be infla-tionary." said Elliott Platt, an economist at the Donaldson, Lufthat the president has done more to the budget than in fact be actukin & Jenrette Securities. Like ally has." Mr. Fabbri said. many others, bowever, Mr. Platt estimated that "high interest rates may be necessary." for there to be Earlier this summer, in a study no link between deficits and infla-

BOOKS

IN THE HEAT OF THE SUN By Robert Bernen, 133 pp. \$17.50. Hamish Hamilton, 90 Great Russell St., London WCL

Reviewed by Anatole Broyard

PEOPLE whose business it is to ob-PEOPLE whose busiless in is to the longer look at the external world as closely or carefully as we once did. We may have reached a point in our evolution where we are bored by evolution where we are bolca by things. There are too many of them for us to feel any loyalty or curiosity, and we are fatigued by the speed with which they change. Another theory is that we live in-constructive in a psychological land-

creasingly in a psychological land-scape where things are merely signals or stimuli. We're too sophisticated for the real which lands like a bill the real, which looks like a child's drawing after the hyped-up versions of movies and television. Novelists seem to have lost interest in describ-ing the external world and only poets persevere, perhaps because they see not things, but "objective correlauves." Whether these notions are true or

not, it is reassuring to find someone like Robert Bernen who describes in exquisite detail just about everything he sees. "In the Heat of the Sun" reads like the observations of someone who has just come out of several years in solitary confinement into a world filled with phenomena. He reminds us that looking used to be a form of pleasure, that at a certain age in our lives, and in the life of man. it was one of our principal pleasures.

A woman's secretive face rising above a lion's body, a half-naked girl dancing on a dog's back, musicians, hawks, shells, serpents: Bernen's de-scription of the capitals in a Romanesque eburch expresses his delight in the diversity of the medieval imagination. He writes about the capitals with a sense of urgency, as if he realizes that the stone cannot last forever, that it will grow old and die like everything else.

Bernen has gone to Collioure in France, on the Mediterranean coast near the Spanish border, to do his observing, and it is a very good place for the purpose. Henri Matisse felt the

same way and lived there during the latter part of his life. Of course Colboure has changed, Bernen observes. In evolving from a small fishing town to a nourist resort, it has become. "tedious to itself." But this tedium too is part of its life now, taking the place of the life it has lost.

.

"In the Heat of the Sun" is filled with sudden realizations of the poculi-arity of things: a cafe kined with minrors that turn everything into a Cubin composition. On the wall of mother medieval church, there is an amening relief 40 feet above the ground where one can hardly see it. When Bernen goes to a concert at Sainte Chapelle in Paris, he finds the outpipresence of the police, whose headquarters are near the chapel, impossible to reconcile to the music.

He talks to a lonely young man whose job it is to be both guard and guide in the almost descried rains of a remote castle. It is as if he is a voice rying in the wilderness, standing guard over French history. Yet life goes on in Collioune. His landlady, Madame Fissier, recites re-

cipes, acting out each step, to Ber-nen's wife, who is an art historian A hard-faced bride with dved hair manries a bored-looking groom. The Communist Party puts up a poster saving: "The middle classes have turned life. into a commodity. Let's not die like things.

Bernen reads like a student of Francis Ponge, a very good French poet who published a book called "Taking the Side of Things." The insignificant, Ponge wrote, "is all my exercise and my hygienic sigh." He advocated "the salutary lesson of smallness" and aimed at "prodigies of sustained attention.

Sometimes, perhaps, Bernen's sighs are a bit too hygienic and his prodi-gies too sustained. When he does arr, though, it's on the side of the angels.

Anatole Broyard is on the staff of The New York Times.

THE LUCK OF HUEMAC A Novel About the Aztecs

By Daniel Peters. Illustrated with maps. 657 pp. \$16.95. Random House, 201 E: 50th St., New York 10022.

Reviewed by Christopher Lehmann-Haupt

THOUGH it's not really fair to Daniel Peters, the reason I began reading his "The Luck of Huemac: A Novel About the Aztecs" was that I wanted to regain the world depicted so beguilingly by Gary Jennings' "Az-tec," another historical novel about 15th-century Mexico, which was published late last year. So my dumb hut natural first reaction to "The Luck of Huemac" was to resent it slightly for the degree to which it is different from "Aztec

Most of all, I missed the narrator of "Aztee," the nearsighted, ill-fated Mixtli, who tells his bloody history to an appalled team of Spanish mission-aries. And because of who Mixuli is, I missed the humor and outrageousness of "Aztec" — particularly the croti-cism and appalling violence that lend it its quaint but civilized barbarity, if that isn't too outlandish an oxymoron. The earlier novel also helps "The Luck of Huemac," I should quickly add, because the two stories are enough alike for a reader to go on anticipating the peculiar surprises pres-ent in almost every chapter of "Aztec.* Very quickly, of course, "The Luck of Huemac" establishes its own mood and expectations. It's told in the third person singular instead of the first person used in "Aztec," for one thing, and it lacks the frame that the bishop's letters to his emperor provided in the earlier novel. the carner novel. More important, it spans a greater period of time. It begins in 1428, when the cities of Tenochtitian and Tlatelolco (which today lie at the heart of Mexico City) were first flex-ing their muscles in the Triple Alliance formed by Tenochtitlán, Texcoco and Tlacopan. And it ends in 1520, with the triumpb of Cortes, or Lord Malintzin, as "The Luck of Huemac" refers to him throughout, over the ab-ject Moctezuma II (or Montezuma, as the conquering Spaniards corrupted it).

1454, the youngest son of Tenochritlan's chief of protocol. He's an incredibly ugly man, with a receding chin and ears that stick out like jug handles, but he has eyes so powerful that he can stare into your soul and even stop your heart.

From the beginning of his life, Huemac has found it hard to make friends, so he more or less has to excel at fighting and playing *ilochtli*, the royal ballgame of the Aztecs. What's more, he's trained as a sorcerer. He has a nohually, or disguise, that gives him the power to change himself into a hawk. He's been known to enlist the help of the gods in getting rid of his enemies. He has fits and sees visions of the future, particularly one that reveals the end of his civilization.

So while "Aztec" is about surv and resourcefulness, "The Luck of Huemae" is heroic and mystical and romantic. While "Aztee" is comic and cynical. "Huemae" is about loyalty and sentiment. While "Aztee" more honestly recreates at least the idea of an alien, barbaric culture, "Huemac" is more atmospherically realistic. Is more aunospherically realistic. -While "Aztec" makes few apologies for the practice of human sacrifice, "Huemac" establishes a subtle moral hierarchy in which monogamy and re-ligion that doesn't involve human sacrifice are ranked as superior to polygamy and sacrifice. In short, we might conceivably be able to live in the world of "Huemae." "Aztee" we wouldn't even want to visit. Yet all in all, the two books are far more alike than different. They con-tain the same historical figures, the same geography, the same wars, the same gods, the same religious practio-es and domestic habits, the same momentous games of *tlachtli*, even the same historical incidents, including the Texcoco court scandal involving the insatiable sexual appetite of one the insanable sexual appende of one Chalchinhneneti (meaning Jade or Precious Vulva), the sister of Moc-tezuma II. In "Huemac," she is exe-cuted by strangulation. In "Aztec," her punishment is too elaborate and extreme even to be described here. So it's impossible not to associate the two books. Having read "Aztec" last February and having just finished "The Luck of Huemac," I'm already beginning to thread their stories together into one brilliantly colored tap-estry. If I had to choose one, it would have to be "Aztec." But I'd rather read both. If you are interested in Az tec history, as you surely will be after reading either of these books, you'll want to go straight into the other and straight on through.

TROUBLE IS ... IF IT TURNS OUT REAL GOOD, WE WON'T . REMEMBER HOW TO MAKE IT AGAIN .

Imprimé par P.I.O. - 1, Boulevard Ney, 75018 Paris

Most important of all, Peters' protagonist is very different from the one in "Aztec." He is Huemac, born in

BRIDGE

O^N the diagramed deal, one might expect North and South to reach six clubs or six spades or six notrump. But the obvious diamond lead trump. But the obvious dramond lead defeats all these contracts, and indeed defeats three no-trump. But South managed to maneuver into the only slam that could not be beaten with the lie of the cards. At his third turn, he unexpectedly showed his there and

lie of the cards. At his third turn, he unexpectedly showed his three-card heart suit instead of rebidding spades, and found himself in an unlikely slam that appears quite shaky. The diamond lead was won, and a spade was led to the ace. Three top clubs were led, and East did the best he could by ruffing with the heart ten. South overruffed and discarded dum-my's remaining diamond on a snade my's remaining diamond on a spade winner. The heart six was led for a finesse against the nine, and East had to win the ace. A diamond return forced dummy to ruff, but it was then easy to draw the remaining trumps and cash club winners to make the slam.

Left-for-Dead Steelers Struggling Back

By William N. Wallace New York Times Service

LATROBE, Pa. - A sign startles the visitor coming here to St. Vincent College, where the Pittsburgh Steelers have trained for 13 vears. The sign with the arrow on the campus road says "St. Vincent Cemetery." It has its symbolism. The playing fields have been the

. . .

- 2

career burial ground of many a young football player who tried and failed to win a place on the Steeler teams that dominated the National Football League through most of the 1970s. The older players remained so good so long that openings for newcomers were all but nonexistent.

This summer is different. The Steelers last year lost seven games, failing to qualify for the playoffs for the first time in nine years. There are job openings, and the squad that leaves St. Vincent Aug. 28 could have a dozen new faces. There might be as many as nine changes in the lineups that start the season Sept. 6.

In Transit

It is not that Coach Chuck Noll is tearing up a onetime champion-ship team after it failed to win a fifth Super Bowl. The changes come more by coincidence than by design, the coincidence of age, em-phasis and injury. The Steelers are a team in transition.

Excuses do not exist in NoH's stern world. Injuries are glossed over. But a tremor went through the organization after Jack Ham broke a bone in his left arm during the first exhibition game against Cleveland, Ham, an outside linebacker who is as good as any pro at his position, will be out until November, .

Randy Grossman, a tight end, will miss a month with two broken ribs; Bennie Cunningham, the other tight end, has yet to go through a season without an inju-ry. Ted Petersen, the offensive tackle, is out while recovering from surgery to remove a benign hip tu-mor. Is this to be last year all over again, another season with injuries.

striking all parts of the team? The prideful players now see those injuries as the reason for their slip last year in a campaign that began with a motto, "One for the Thumb" - meaning a fifth Super Bowl ring. Larry Brown, one of the few veterans of the four previous victories who managed to start and finish all 16 games, offered a perspective the other day.

Incomplete

tough year." said Brown; the right tackle on offense. "Our two all-pro receivers, Lynn Swann and John Stallworth, were both out. Terry Bradshaw was playing with inju-ries. Jack Ham wasn't 100 percent. We lost Jon Kolb and Steve Cour-

son for a while...." Brown's list was incomplete. Only eight players started every

game, Because the 28 pro teams are so even it is the belief of Brown, a 10-year veteran, that fortune as well as ability is important to any. team's success. "You have to be lucky," he said. "You have to have skilled people, but you have to be lucky to have the ball bounce your

Wolfley are possible successors for is to be good, or good enough, The Steelers do not practice for two oldtimers, Kolb, 34, and Sam Davis, 37, at left tackle and guard. each week. "You want to be as good as you can be often enough to win the di-At tight and, Cunningham will fill in for Grossman, who became vision. You never know what it

The defense gave up 313 points enough, and two years later we last year (compared with 262 in won the same division with a 9-5 1979 and 195 in 1978), and there record and Cincinnati was ont of were only 18 sacks of opponent it. We were consistent enough. quarterbacks - eight fewer than Last year we finished third. We were not consistent enough." any other NFL team.

At the current camp two young linemen, Bob Kohrs and John Goodman, are being groomed as designated pass rushers for the obvious passing downs.

Loren Toews, who took over for Ham when he broke an ankle in 1979, is doing so again. Anthony Washington and Bill Hurley, two rookies, are possible replacements for Mel Blount and J.T. Thomas in the secondary. The goal is to add speed in the back if there isn't going to be much of a pass rusb up front.

Lastly, David Trout, a 5-foot-6-inch, 165-pound free agent from the University of Pittsburgh, is pushing Matt Bahr (5-10, 165) for the role of please history the role of place-kicker.

So these Steelers are certain to have something of a new look. Can they make it to the top again? There are no residuals from

last year," said Brown. "You come to camp and everybody starts new. You don't have any better chance or any less chance than anybody

Motto '81

All-pro center Mike Webster, an

eight-year Steeler, says he does not know what lies in store, but he knows what the club's 1981 motio should be: "Consistency." "The definition of being good in this business is to be good for all

16 weeks. Some teams can look just great one week and horrendous the next. The important thing

both halves of the season.

Webster remembers times when

great lengths of time, and their morning sessions now are restricted to slow-motion walk-throughs of plays and reactions to plays for will take. In 1975 we were 12 and 2 and 45 minutes with the athletes wearing Bermuda sborts and T-shirts.

> Noil said the ultimate goal would be to have oo practice at all provided the team was "efficient enough" so that it could get along without rehearsals. He does not foresee that day coming soon.

"Every year we try to become more efficient," he said. "We want to spend less time if we can on the practice field. Less time, but get more work done. So the key is bow efficient your teaching can become.

team. "But we've gotten perform-"You do not have to go over ance out of one area of our team so some of the things when you get a veteran football team. But then it that we won," he said. "One area --- not always the same one --- can is tempered by your young people. carry you from one week to the next. You'd be surprised bow that You want to make sure you don't leave the young people behind, and you have to be flexible enough evens out in the end. The load shifts depending upon who has the netimes so that you don't work the old guys too long." For Brown a little bit of luck

Efficiency, consistency and luck goes a long way; for Webster consistency is the answer. Chuck Noll - qualities tied to the revival this season of the Steelers. Those qualilikes efficiency, and he applies the ties and some new faces.

Yankee second baseman Willie Randolph dropped a potential double play ball in the lap of Chicago's Mike Squires in the third inning Wednesday; batter Carlton Fisk reached first base on the play, and the White Sox went on to score four unearned runs.

Players Are Expected to Endorse Playoff Plan

added their endorsement by late NEW YORK - Major league Thursday. baseball's top officials, after days of trying to rework their much-crit-

Marvin Miller, executive director of the association, said Wednesday night that about half of the player reps had been heard from, but the needed majority still had not been obtained because "there were some dissenters." player representatives confirmed late Wednesday, would change the arrangement for determining divi-sion playoff matchups, should the same team win division titles in back helms of the result.

Among them was New York Yankee rep Reggie Jackson. "I voted negatively because 1 felt it throws out any team that finished well in the first half," Jackson said.

"It should stay the way they made it [after the strike.] All these bypothetical cases that have been coming up bave scared baseball and scared the commissioner's office into acting on something that was created by the media."

The Yankees already were as-sured of berth in the division playoffs as one of the four teams atop the divisions when the strike began June 12. The others were the Oakland A's in the American League and the Los Angeles Dodgers and Philadelphia Phillies in the National.

of-five competition. The originally announced for-mat was roundly criticized because Chicago White Sox rep Lamar Johnson also said he had voted it opened the possibility that a against because "if you play good team could get into the division playoffs via the wild card route by in both halves, and you doo't fin-ish at least second in the second half, yoo can't make the playoffs."

The revision, apparently drafted by Commissioner Bowie Kuhn and the two league presidents, Lee MacPhail of the American and Chub Feeney of the National, did find favor with some, although in some cases begrudingly.

John Curtis of the San Diego

four batters without allowing a walk in 7% innings. He gave up Landreaux's fifth home run of the year in the fourth and Guerrero's 11th of the season in the eighth. Reliever Lee Smith surrendered Landreaux's other homer, in the ninth.

Chicago scored twice off Dave Goltz (2-1) in the fourth. Leon Durbam singled, Bonds tripled to left and, following a walk to Tim Biackwell, Bonds came home on Ken Reitz' grounder. Bonds picked up his second RBI in the fifth, doubling deep to center to score Durham, who had walked.

Observer

Millions for Mistakes

By Russell Baker

NEW YORK — 1 don't suppose anybody can make it through a lifetime in the 20th-century twilight zone without an occasional suspicion that he is living in a global booby batch.

Still, most of us try not to think that way, and I am no exception. Despite mountains of evidence to the contrary. 1 i

keep assuring thing from the ar terror to frozen onion rings makes good sense and can be rationally explained by people a lot saner than 1

am. Then along comes something like the Air Force's \$138-million plumbing mistake. Plumbing is an inelegant word to describe such a dandy piece of business, but that's basically where the Air Force went WTODg.

Baker

* * *

It was putting up a large building whose purpose required a great deal of intricate tubing and piping. only the people designing the building and the ocople designing the tubes and the pipes apparently never got around to talking to each other, so when the pipes and tubes came it turned out that none of them fitted the places in the building for which they supposedly bad been designed.

The result is that everything has to be done all over again, which will add \$138 million to the cost of the job. All right, you say, nobody's perfect. I can go along with that, Still, when you're putting bundreds of millions into a construction project, you'd think there would be some \$75.000-a-year man whose job is to make sure the plumbers and the carpenters are both looking at the same blueprint.

All right, this fellow's secretary forgot to remind him to send the blueprints to the plumbers. I can see that happening.

* * * To me, admittedly, \$138 million is not salami, as it is to the Penta-goo. If I try to squeeze the Treasury for \$500, the Internal Reveoue

tion with thumbscrews. I can go along with that. The Air Force and I have differ-ent values. If Γm walking along and see a penny in the gutter, I der't hether don't bother getting my bands dirty picking it up. The Air Force is that way about bundred-milliondollar bills. If it isn't a billion it's not real money. All right, I can go along with

that. What bothers me, bowever, is this: What is the Air Force doing in the construction business?

Sure, it has to build barracks and mess halls and airplane hang-ars. I can go along with that. But this \$138-million-mistake building is not like those things. It seems to be some gigantic structure for test-

ing new jet engines. When it's finished, throwing in the bill for the \$1.38 million mistake and allowing for inflation and cost overruns yet to come, it will probably cost about half a billion dollars. I can go along with that. The Air Force uses jet engines. It has to test them, doesn't it? I bave a problem, though, with

why in the age of rockets the Air Force is plunging balf a billion into a building to test new jet en-gines. If the test building costs half a billion, how much are these still untested jet engines going to cost? Billions and billions, surely.

* * *

For the first time 1 an tempted to say, "It's crazy." Why spend bil-lions on new engines for new air-planes carrying new bombs that won't even be deliverable until after the rockets bave blown everything to kingdom come, while the government axes the public-television budget as a waste of money? Is it worth surviving the thermonu-clear bolocaust if there is no "MacNeil-Lehrer Report" that night to present the balanced views of both Washington and Moscow? I do not cry. "This is crazy." If I did, the Air Force would remind me that U.S. security resis oo a "triad" of rocketry, submarines and airplanes. Without the airplanes. Jefferson will be silenced by Marx. And after all, is \$138 million not money well wasted in the eternal struggle to insure every

American the right to a future glistening with armaments? I can go along with that. After all, extremely bright people have figured it all out. If you disagreed with such intelligeot people you'd be crazy. I'll go along with that.

Mel Ferrer

By Thomas Quinn Curtiss

ional Herald Tribune PARIS — Mel Ferrer was the dashing Prince Andrei of King Vidor's screen version of "War and Peace" and at 63, slender, tall, elegant and graying, be suggests the somantic officer of the Tolstoy novel - in Luufti 20 years later. Ferrer's theatrical activities have included

acting, directing, producing and writing and be is continuing to vary his occupations. He is in Paris to play a devious master-mind of international finance in Henri Verneuil's new film, "A Thousand Billion Dol-lars," on which sbooting begins in the Billan-court studio this week with Jeanne Moreau

and Patrick Dewaere as his co-stars. Peter Pan Plans

"My scenes, which will be inserted through the picture, are being shot at the start and at one gulp as I must go to London in early September to produce a film of 'Peter Pan,' be explained. "The Barrie play was filmed as a silent in

1924 and as an animated cartoon feature by Walt Disney in the '50s. I've longed for years to do it as a talkie. "My original plan was for Audrey to be

Peter," be said, referring to Audrey Hepburn. who during their marriage co-starred with Ferrer on stage and screen. "Now we're making a historical innovation with Peter for the first time played by a boy. Wendy will be a 13-year-old girl and not, as customary, a mature actress. Alec Guinness - if his commitments allow -- will be Captain Hook. In the play the same actor who is Hook is the father of the children. This hims of a father fixation, with the children forcing their father, disguised as a pirate, to walk the plank.

"The production is to be elaborate, estimated to cost \$20 million. The silent 'Peter Pan' only ran a week - Christmas week on Broadway. It was just the photographed play. Barrie wrote a scenario for it, which was rejected. Of course, be designed it for pantomime, but it is bursting with fantastic ideas, some of them applicable for the screen today.

Soap Opera

Another assignment awaits Ferrer in Hollywood: the production of a television serial. "It's called 'Behind the Screen' and it's a soap opera about the construction of a soap opera, all the secrets and agonies of prepar ing the sob suds. David Jacobs, the author of the popular 'Dallas' serial, has written it and I am to produce,

"By the way, I am in nontheatrical producoon, too. I have a ranch near Santa Barbara and market the lemons and avocados it yields. I have a bouse in St. Sulpice, Switzerland, which is my European headquarters, With a Cast Including Peter Pan, Howard Hughes, Marlene Dietrich, Lili Marleen and Many Others

thanked me profusely afterward. Irene showed me a script she had received. It was 'A Streetcar Named Desire.' I told her to grab it at once. She did. You know the rest.

"Then Selznick loaned me to Howard Hughes who wanted me to reshoot the finish of a dud he had. It was 'Venderta,' a Car-menesque tale by Merimee. Preston Storges had directed and it was not at all in his humorous line

'Hughes telephoned me to come to his studio late one evening and sent a station-wag on with leopard-skin seats to pick me up. He only worked at night all through the night, and all his affairs were clouded in mystery. He was conferring with an Air Force general who was in cubiler clouder in the regeneral who was in civilian clothes for the midnight meeting. Hughes was planning his Spruce Goose plane, a buge troop transport carrier made of spruce wood. If he got it off the ground by a certain date the government would cover its cost, if not be would have to pay the expenses and be left with a gigantic white elephant.

"Vendetta" was impossible. Hughes had hired a nightclub waiter for an important role because he looked Spanish. He did, but he couldn't act and couldn't learn to act. Instead of two weeks I was there for two years. Meanwhile, Hughes bought RKO and the film was released — but not for long.

"Not long after this I went to Las Vegas to stage Marlene Dietrich's show there. We devised a lighting effect so that she, in a skintight white dress, gave the impression of being nude. It was a sensation. Hinghes had hired the ninth floer of the Desert Inn and was in what he thought was permanent resi-dence. One day the manager came to him and told him that be must move as an international golf tournament was to take over the entire hotel for its visit.

"Hughes got on the telephone and bonght the Desert Inn. And that was not all. At high an electric sign of a neighboring hotel distracted him and he was obsessed with the idea that the sign was shaky and would fall on him. So he bought that hotel, too, and a great deal of land around the airport which had limited landing space. Everyone thought he was crazy to buy up useless territory, but he made another fortune by constructing extended landing space so the big planes, carry-ing carloads of tourists, could come in."

Authored Children's Fable

Ferrer has collaborated on many of the scenarios in which be has acted or which he has directed and as an author has one book, "Tito's Hats," a Mexican fable for children, to his credit. An autobiography?

"No," he said "Not yet. It's too soon. There might be some interesting experiences ahead."

PEOPLE: Patricia Hearst Writing Her Own Story of Ordeal

Several books bave been written about the Patricia Hearst case, but the heiress to the newspaper-chain the heiress to the newspaper-chain fortune has mostly kept silent about her ordeal. Now, however, she is writing a book that will give a first-person account that begins with ber kidnapping in 1974 and ends with her release from prison in 1979. Doubleday & Co. announced that it would publish "Every Secret Thing," which Hearst bas been working on in colaboration with Alvin Moscow. next January. Moscow is the au-thor of the best seller "Collision Course," about the sinking of the Andrea Doria, and "The Rockefe-ler Inheritance." a biography, and

1940 - Landard A.

was the ghostwriter of Richard Nixon's "Six Crises." Hearst, who is now married to ber former body. gnard, Bernard Shaw, and Las a child, chose her book's utle from a passage in Ecclesiastes 12:24: "For God shall bring every work into God shall nring every work into judgment, with every secret thing, whether it be good, or whether it be evil.....U.S. first lady Nan-cy Reagan says shell write a book on relationships between children and their force grande provide Virg and their foster grandparents. Mrs. Reagan discussed her plans during a taping of the Mike Douglas show, which focused on one of Mrs. Reagan's favorite causes, the Foster Grandparent Program. The book, "To Love a Child," will be published next year by Bobbs-Merrill, Royalties will be donated to the Foster Grandparent Pro-gram, with which Mrs. Reagan has been associated since 1967.

* * *

say they will send away their 8year-old adopted son in hopes of mollifying a poltergeist they claim overturned furniture and smashed dishes at their home in Bournemouth, England. Mediums consulted by Burden. 63, and his wife. 55, have said the ghost is somehow being attracted by young Bradley Burden, who is mentally retarded. The spirit is attracted to a little boy," said Burden, a window washer. "It picks on young chil-dren, particularly if he's a weaker boy, which he is." The bizarre events at the Burden began last Friday morning shortly after Burden left for work. Mrs. Burden reported. She said a heater fiew across the floor, dishes were flong about the house and a television was overturned. Police and social workers summoned to the house said they witnessed some of the phenomena and could offer oo oatural explanation. A priest per-formed a rite of exorcism and me-

Catherine and Charles Burden

we is staying with an older sister, "We re hoping to scute him some-where until my wife's health is be-ter." Burden said. "She suffers from multiple sclerosis, and I don't think she'd be able to cope with all that. I never believed in ghosts be-fore, but after the scenes we had, I'm convinced there is a rotten spirit about. He's a real router, a vile spirit. I have no crockery left whatsoever." With a name like Resin the Bow, I found the borse irresistible and so I ber five bucks on him says Mitch Miller in describing his day at the races in Saratoga, He won S46. Müller was in Saratoga to conduct the Philadelphia Orches.

diums held several seasces, but the

dutitis ficto several scances, out the strange events continued. Finally, the family moved out — and all became quiet. Burden, has been staying at a hotel, his wife has

been out of town, his daughter De-borah, 17, is with friends and Brad-

tra, and the fourth race at the track last Friday was called "The Mitch Miller" in his honor. It was in the race that Resin the Bow was ranniog. I don't know anything about horses, but any musician would be attracted to one named for what fiddlers do with a cake of. resin before a performance," Miller said. Miller said he was happy that the horse won the race, and he noniced many others shouting for joy had familiar faces. "Then I re-alized they were all members of the Philadelphia Orchestra and that as musicians they had done the same thing I had," he said. * * *

Ruth Lawrence, 10, is a superhrain who has never been to school. In Huddersfield, England, she has just passed with top grade level an examination in pure multiematics normally taken by 18-yearolds. She hopes to reach university when she is 12 and become a prefessor of mathematics before the in 20. The examination was. "very jokly," she told a reporter. Ruth and ber sister Rebecca, 7. are taught at home by their parents, componer, consultants Harry and Synia Law rence. The sisters learn geography, bistory. English, art and music, ar well as mathematics and compare science. "We thought we consider a better job than the state system and Ruth's father. A government inspector approved the home the uon after asking the girls some questions. Ruth prepared her first computer program when are way six and says she has no time to play with other children in the Yorkshire mill town.

Mel Ferrer

but somehow I spend little time in either place.

"This last winter I was in Germany to play the beavy father in 'Lili Marleen.' I liked working with Fassbinder. He's efficient, quick, inventive. The script was not his; it was by Manfried Putzer and not in the Fassbinder style, but be made it his own in interpretation

Maltilingual Actor

Ferrer was born in New York of Spanish parents. He is multilingual, speaking English, Spanish, Italian, French and German, and bas acted in all of them. He attended Princeton for two years until he was stricken with polio at 19. Treatment under Sister Kenny restored his health. He made his Broadway stage debut in a Cole Porter show, "You Never Know," played in "Strange Fruit" just after the war in a production staged by José Ferrer (no relation), then directed José Ferrer in "Cyrano de Bergerac." A few years later be took the Jouvet role in the American production of Giraudoux's "Ondine" with Audrey Hepburn as his partner.

"David Seiznick engaged me to direct films for him," Ferrer related, "When I arrived be had no films to direct and he sent me oo a mission to inspect a play his ex-wife, Irene Selznick, was trying out in Boston, It was to be ber first Broadway production and it was hopeless. I advised against bringing it to New York, for which both Selznicks
